

Project Title

CS294/194-196 Final Project Report

Group Name: Group Member Names & Emails

The final report should be within 6 pages with additional appendix and references as needed (and total max 10 pages).

Abstract

Summarize your project and its key findings in a few sentences.

improve on your system. Include acknowledgments of others who help with the project, if applicable.

Introduction and Problem Definition

What problem are you trying to solve? Why is it important? What are your key unique contributions?

Bibliography

Include citations here for any works you reference throughout the report.

Related Work

Include a literature review of related works. How does your project differ from these works and improve upon the state of the art in your area?

Appendix (Optional)

Include any supplementary proofs, data tables, or code snippets that did not fit in the main body.

Approach

What did you do to solve the problem you described in the introduction? How and why does your solution improve on the related works you discussed?

Evaluation

How did you evaluate the success of your project? What experiments or tests did you perform? Which metrics did you look at? How did the results compare to your expectations?

Conclusion and Future Work

What are the high-level takeaways of your project? Please mention any outstanding questions or areas of future work that other researchers might be interested in to further
