 - current issues: https://bugs.eclipse.org/bugs/show_bug.cgi?id=478172
 - future: Viewers 3 (Adam Lengyel, Sirius integration)
- Bugs
 - https://bugs.eclipse.org/bugs/show_bug.cgi?id=464120 (cyclic linking)
 - https://bugs.eclipse.org/bugs/show_bug.cgi?id=478290 (Observer)
 - https://bugs.eclipse.org/bugs/show_bug.cgi?id=478279 (Variables view)
 - https://bugs.eclipse.org/bugs/show_bug.cgi?id=477797 (Surrogate extension vs dependencies)
 - EIQ: 1.1 is getting flooded with issues, see https://bugs.eclipse.org/bugs/buglist.cgi?bug_status=UNCONFIRMED&bug_status=NEW&bug_status=ASSIGNED&bug_status=REOPENED&classification=Modeling&columnlist=assigned_to%2Cbug_status%2Cshort_desc%2Ctarget_milestone%2Cversion&list_id=12711648&order=target_milestone%2Cversion%2Cpriority%2Cbug_severity&product=Incquery&query_based_on=IncQuery%20active%20bugs&query_format=advanced
 - unsubmitted recursion issue by Tamás Szabó (virtual machine is being created for Gaben, TODO issue creation)
- VIATRA debugger demo (Uzi, Peter Lunk)
 - https://wiki.eclipse.org/VIATRA/Transformation_API/Adapter_Framework
- MPS-IncQuery: new syntax demo (Tomi)
- Restructuring proposal
 - post 1.1 / 0.8 timing
 - strip EIQ to be a bare query engine, move everything else (including EVM) to VIATRA
 - rebrand EVM-dependent EIQ features as VIATRA features

Minutes

- Meeting time: 14:00 Thursdays; previously incorrectly communicated
- Xtext upgrade issues: problematic communication
- Viewers
 - Csabi will look at bug 478172
 - New viewers: special unidirectional transformation in VIATRA + viewers as a visual aspects
 - Old IncQuery Viewers may be replaced
 - Viewers performance aspects: somebody will be needed in October
- IncQuery issues: at the latest next week with Ábel + István + Zoli will look at issues
- Restructuring
 - IncQuery Tooling EVM-dependent: QE: data binding; Rete visualizer: viewers
 - We should avoid circular dependencies between IncQuery and VIATRA
