

Lieplaukė RCC Birth Register Entry Data Table for 1828-1848

(selected entries from 1828-1848 Lieplaukė RCC birth registers in LVIA record group F.1479)

[This Table was last updated on 6 Jan 2019]

General. This Register Entry Data Table (REDT) contains translations / transcriptions of the primary names, dates, and places recorded in *selected* individual entries from the *online* 1828-1848 birth registers of Lieplaukė Roman Catholic church (RCC). Lieplaukė is a town in Lithuania; it is in the Telšiai district municipality in Telšiai county.

Selection of Entries for Inclusion in Table. This Register Entry Data Table contains only a *selected* subset of the entries in the online 1828-1848 Lieplaukė RCC birth registers. My primary objective is to eventually include every entry where a parent of the baptized child has one of my ancestral surnames. My ancestral surnames within Lieplaukė RC parish are: *Narmontas*, *Mažeika*, *Petreikis*, *Urpšas*, *Gegužis*, *Pukšmys*. Additional entries are also included for various reasons.

Languages. The entries in these Lieplaukė RCC registers are about ethnic Lithuanians but the entries are not written in the Lithuanian language. The entries in the 1828-1848 registers are *handwritten* in the *Polish* language. In the Table below: the names of Lithuanian people and places are in modern Lithuanian; any text *transcribed* from the register entries is enclosed in parentheses; and all other information is in English.

"Reverse Translation". In general, the names of ethnic Lithuanian people and places were often "Polonized" (converted into Polish-language versions of the names) by the priests who entered the names in the RCC registers. When translating register entries, Lithuanian genealogists attempt to reverse the original conversion process; they attempt to convert the Polonized names back into corresponding Lithuanian-language names, and they use the surname suffixes of modern Lithuanian. The Lithuanian names that appear below in the Register Entry Data Table have been converted / translated from the Polonized names back into Lithuanian names. This process is relatively straightforward for *place* names and *given* names, but the translation of *surnames* can be highly subjective, and alternative similar surnames are often possible.

Transcribed Text. In the Register Entry Data Table, the names and selected words that are *enclosed in parentheses ()* are my transcriptions of the handwritten names and words as they appear in the register entries [with some exceptions as explained in the Generic Endnotes to the Tables]. [The general exception: The surnames of the fathers of the baptized children are typically in the Genitive-case plural-form in the actual register, but the *suffixes* of the transcribed surnames in the Table below have been adjusted to show instead the Nominative-case singular-form.]
