Provide a general synopsis of what the course/activity covered/contained.

This presentation covers the use of a life cycle approach, similar to other infrastructure, when addressing sustainability. It includes the strategies in place to reduce green house gas emissions during the manufacturing process, use of performance engineered mixtures, optimized pavement design, reductions during the use phase, recycling and end of life. Additional benefits such as resiliency and benefits to the heat island effect will also be addressed.

Attach any documentation of participation: i.e. Certificate of Attendance/Completion, transcripts, handouts, tests, programs, outline, reports and other demonstrative evidence of attendance.
