

P-TECH Lottery Procedures

Hamlin Collegiate ISD is committed to providing equitable access to the P-TECH program. At this time, **all students in grades 9-12 are automatically admitted into P-TECH**; therefore, a lottery system is not necessary.

However, should the number of interested students ever exceed program capacity in the future, HCISD will implement a **random lottery process** to determine admission. The lottery would:

- Be conducted in a fair and transparent manner,
- Include all applicants who meet basic eligibility requirements (residency and grade level),
- Be overseen by campus and district administrators, and
- Ensure that no student is denied access on the basis of academic achievement, attendance, discipline history, or other criteria.

Families would be notified in writing of lottery results, and a waitlist would be established if needed.
