Welcome, Families!

The WT Schools Math Department is excited to welcome you and your family to the first year of our new and highly regarded math program, *Eureka Math*² in Grades K-5! This research-based program focuses on developing essential math concepts with depth, thoroughness, and active engagement.

Now that we're a few days into the program, we'd like to extend a heartfelt thank you. Building confident and capable learners takes a strong partnership between educators, students, and families, and we truly appreciate your support.

Throughout the year, we'll be working through six modules (units), guiding students through the content standards in a purposeful, scaffolded way that promotes deep conceptual understanding year after year.

An Introduction to *Eureka Math*²

*Eureka Math*²® is your student's revolutionary new math program. Its learning design allows your student to build a deep conceptual understanding of mathematics that will better prepare them for college, career, and beyond. Learn more about the Great Minds® approach to mathematics instruction.

Great Minds honors and celebrates the role caregivers play in each student achieving greatness. Thank you for your partnership. We hope these resources support you on your *Eureka Math*² journey.

We look forward to sharing more about the student resources and overall program during our Elementary Back to School Night presentations. For additional information that night, please consider stopping by our Math Department booth near the front office.

Warm regards,

-The WT Schools Math Department
