

How to setup user desktop to print Cyclelution Inbound Pallet Label and Small Label.

1. Make sure you install the printer and its drivers first. Set this label printer as your default printer
2. Once the printer is installed, please make sure to change the paper size in printer setting to either 4" W X 6" H for large label or 3" W X2" H for small label.
3. If you had previously installed CycleLution Label Contro, go to Control Panel / Programs /Program and Features , click on CycleLutionLabels and uninstall it.

Then Download Updated Cyclelution Label Print ActiveX here:

new

<https://www.dropbox.com/s/w55zeztmhtwc0go/cyllabsetup.06212019.exe?dl=0>

Old (do not use this one as this is for old version)

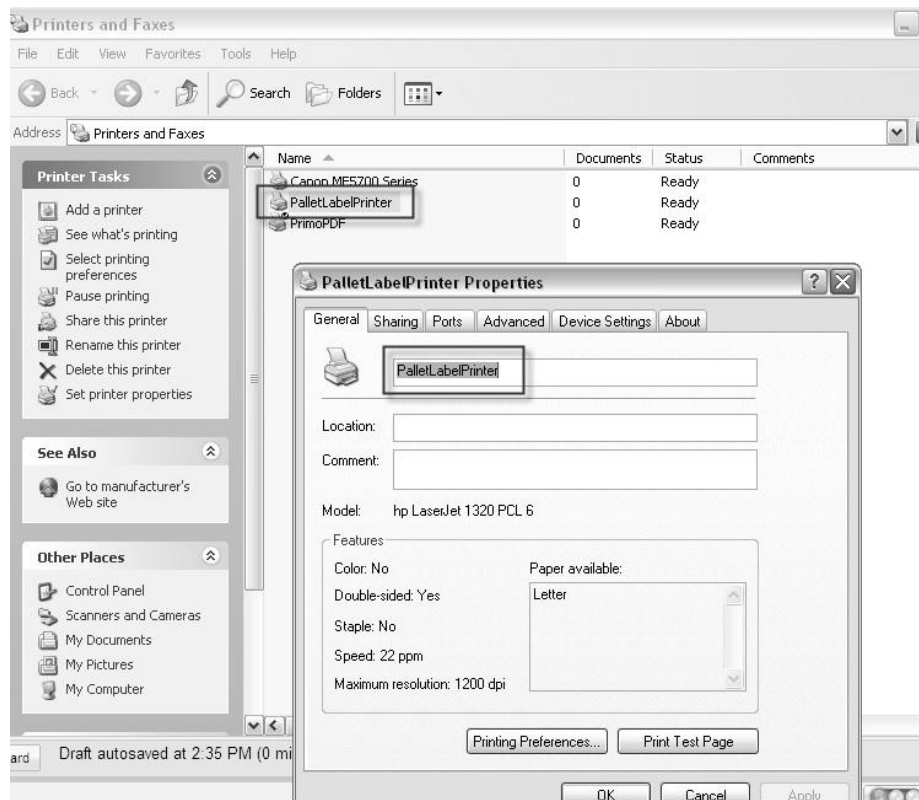

<https://www.dropbox.com/s/l9170wd46v1z1ta/cyllabsetup.zip?dl=0>

4. Double click to run cyllabsetup, the default install path is "C:\Program Files\CyclelutionLabels", don't change it.

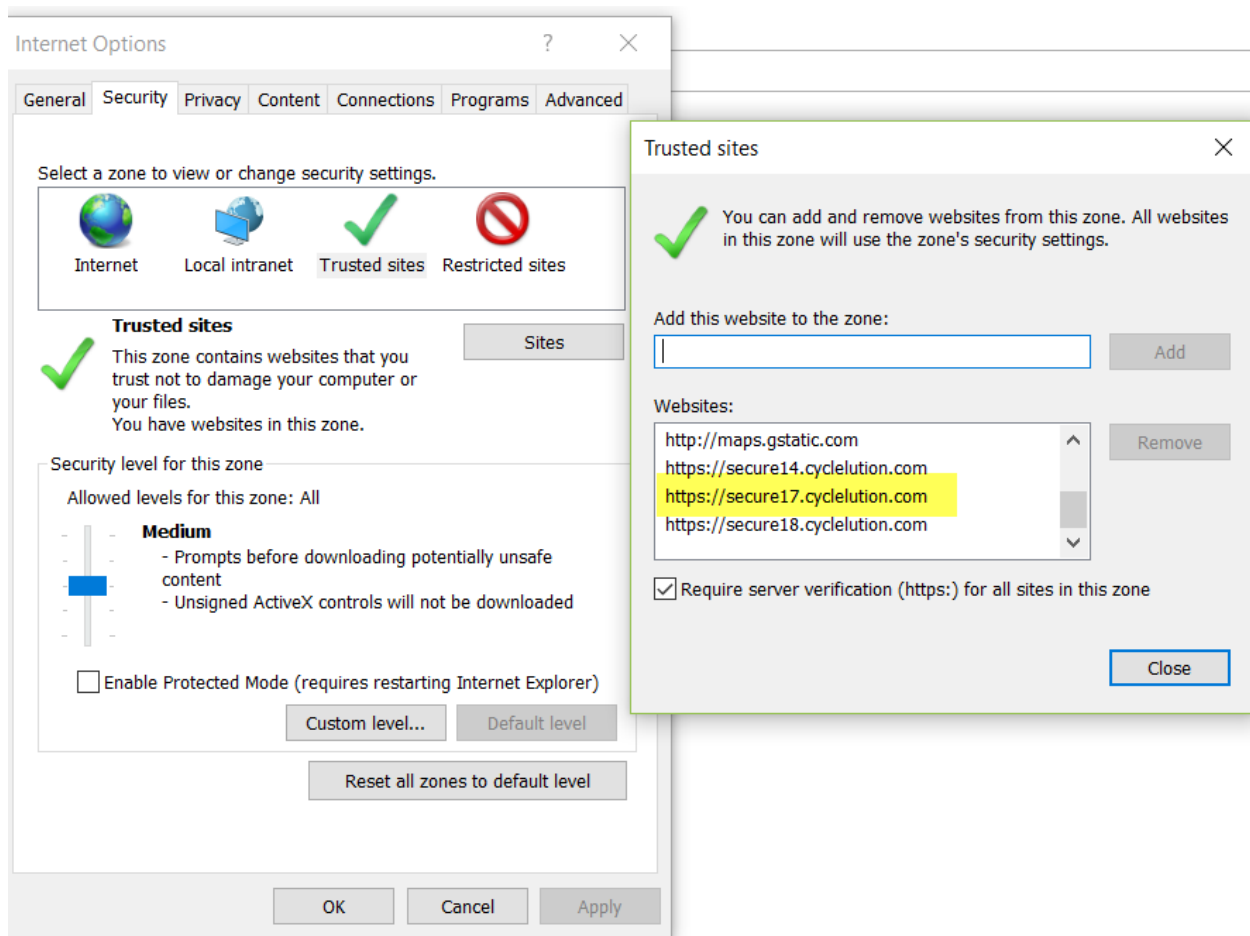

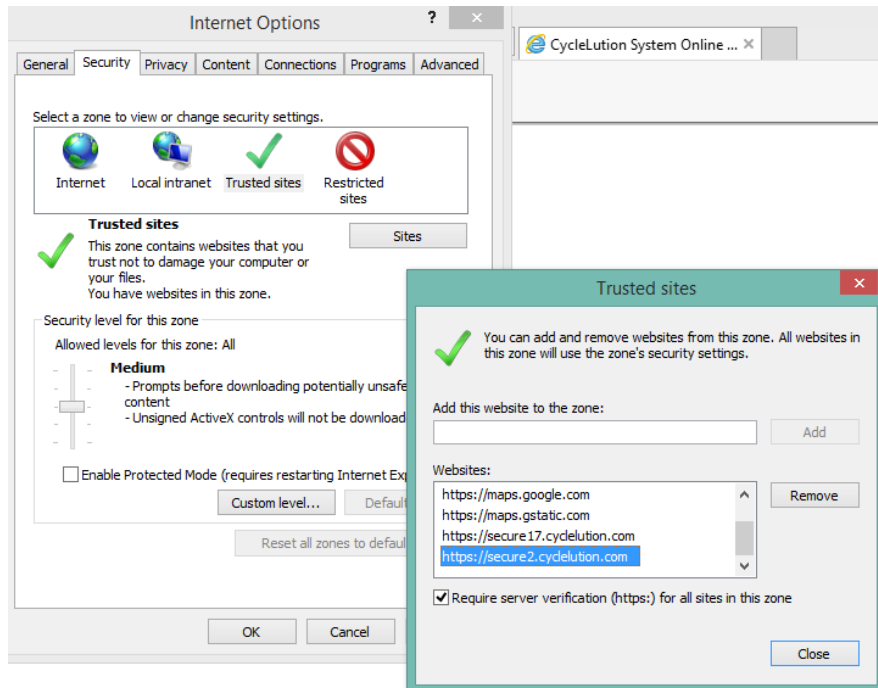

5. Rename your local printer which will be used to print Pallet label to **PalletLabelPrinter**, or any name start with PalletLabelPrinter, for example "PalletLabelPrinter on Server";

If you use one computer to connect to 2 label printers and print both Pallet Label and Small package label, please follow the below instruction to rename your printer. **Rename your local printer which will be used to print Small label to SmallLabelPrinter**; or any name start with SmallLabelPrinter, for example "SmallLabelPrinter on Server";

If your computer only connects to one label printer, the label will be printed to the default printer, you don't have to rename the printer, just set it to the default printer.

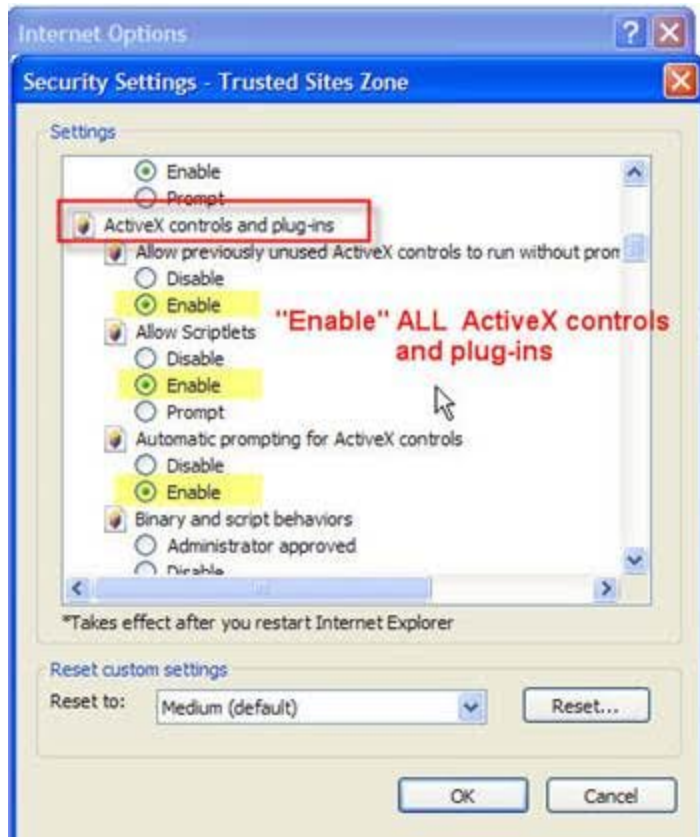

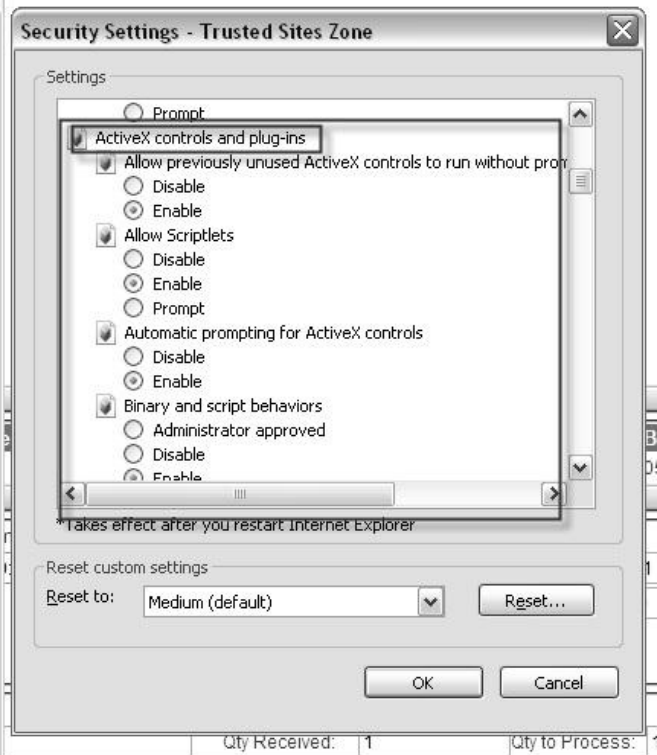

6. Goto IE\Tools\Internet Options\Security\Trust Sites\Sites ---> Add the CyclolutionV3 application URL onto the Trust Site List. **It shall be either of the following -**
<https://secure2.cyclolution.com> or <https://secure17.cyclolution.com> **If your computers are placed within networks or domains, pls also add your domains to the trusted site.**

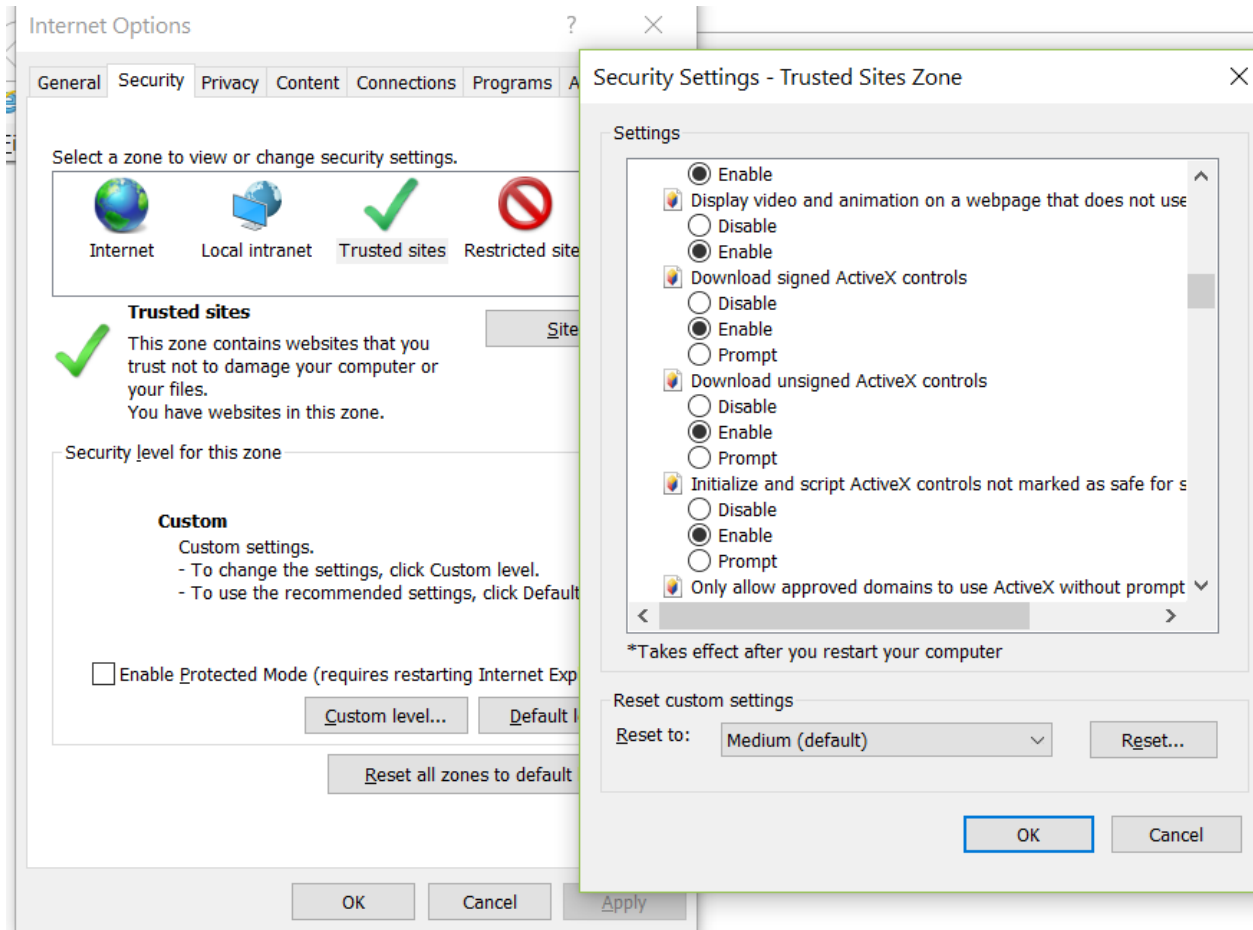

7. Goto IE\Tools\Internet Options\Security\Trust Sites\Custom Level

Set all ActiveX related option to “Enable”

Under Miscellaneous category: enable "Display mixed content"
