Interactions:

After the player has upgraded Nova, while wearing her go back to **Dock 13**, Nova will notice Maku on her knees slurping up leftover goo.

Steele can either Interrupt her, fuck her, or wait for her to finish.

Interrupting her will cause her to act shy towards Steele, fucking her will make her act like a bimbo, and waiting will make her somewhat normal where she is neutral towards Steele.

You'll need to have a canister of **GaloMax** in your inventory in order for her to join you, she'll stay at **Dock 13** until the Steele has one, if they do have one they can give her it. She'll proceed to thank them several times and ask if she can be friends with such a nice person such as them. If you choose yes she'll become a demonic blade and will appear in your inventory. To access her menu simply do interact while in your inventory and it'll have the option of selecting her.

Menu Options:

Talk: Depending on what Steele has in their inventory she'll give dialogue on that item, if it's a weapon she'll say you should give her it.

Give Weapon: Giving her a melee weapon will grant her a new weapon type that she can transform into.

Sex: Gives sex options

Feed: Feed her cum or breast milk, either one will make her happy and give you the charged weapon buff.

Customize: Here you'll be able to change the weapon type, color, size, and material. You'll also be able to change her hair length, dick size (if she has one), breast size, ass size, hip size, and if she has a dick or not. As well as give you the option to change her genital, nipple, skin, horn, hair, and eye color.

Sex Scenes:

Tentacle Anal/Fuck: Maku grows several tentacles and has her way with your goodies down below.

Tentacle Spank: Maku wails on your ass with her tentacles, leaving her mark.

Tentacle Grope: Maku gropes your chest, your dick (if you have one), vagina (if you have one), and ass. Drooling as she feels her owner's body.
