

# VocxLotto Rules

1. Every Draw will only have 2000 maximum entries.
2. A single entry is equivalent to 40 krunas. So if you want to get 10 entries, it will be 400 krunas.
3. A single entry will always have the same odds (2000:1 Odds)
4. Every Draw will have a limit date. This means if the limit date is reached, the draw will close and we will pick a winner even if not all entries are sold out.
5. If we receive more than 2000 entries which is currently the maximum entry we have per draw, we will refund the excess amount back to each player through /pay.
6. If we reach 2000 draws before the limit date, we will close the current draw earlier and the winner will be picked soon.
7. If there are empty entry slots by the end of the limit date, the empty slots will be filled by us (the company). So buying more entries will definitely increase your chance to win!
8. We only accept banknotes in our lotto chests. So do /withdraw (desired amount) and place it in our chests.
9. We will take entries from Chest (A-D) from first to last.
10. If a player happens to enter banknotes less than the minimum amount (20 Krunas), entry won't be included and it is not refundable.
11. Before playing our lottery, make sure to check the sign to see if the Lottery Status is Open or Closed.
12. We will wire the prize pool to the winner ASAP and we (currently LashGaming) will congratulate you through the mail.
13. Playing our lottery means that you read all of our rules and you agree with it.

\*Rules might change from time to time.
