# How it Works – How To Play RummyCircle online cash game

RummyCircle is an interactive app where you can play your favorite Rummy card games on your smart phones. Here are some things to expect from the RummyCircle app on your phones:

Launching the app, you will be prompted to a menu where you are allowed to play a bunch of different game modes. All of these game modes will mostly feature Rummy. In case you are unaware of what Rummy is, it is a card game played by multiple players. The whole game works on the concept of making sequences and sets. A sequence is usually made with having cards of an ascending order of the same category. This is also known as a pure sequence in Rummy. While it may depend on the game mode that is currently being played, players have to make these sequences and sets in order to win a match.

Every match will start with both players tossing for determining which one of them goes first. The one who wins the toss has to do his turn first. Each player is given limited time for his turn where he has to pick a card from either a closed or open deck. Both players will have a bunch of cards on their hands.

At the end of each turn, players have to discard at least one card onto the open deck.

This is the most basic rule of how these Rummy games work. However, with RummyCircle, not only are you allowed to play a bunch of different unique game modes,

but you can also go against different opponents in various tournaments, Rummy Rumble, as well as Cash Games.

In these modes, players can gamble their cash as they play against different opponents. Just like most other card games, luck is an important factor in Rummy. However, the game also makes full use of the player's skill level. For players that aren't feeling much confident on gambling their money in challenging tournaments, they are allowed to participate in practice games for each mode available in the game. This way, every player gets to enjoy Rummy, whether he is in for gambling or for simply enjoying the game.
