

Hello Dash Community!

This proposal covers **Business Development and Events activities** for July.

The previous proposal was for May.

What has been completed so far:

1. I have confirmed with Hot Protocol team (https://x.com/hotdao_) their willingness to integrate Dash into both **their wallet** (200k monthly users) and **HEX Exchange** cross-chain aggregator. The planned integration includes native Dash balances, transfers, swaps, and cross-chain exchange routes through app.hex.exchange.

We are now moving to the technical scoping phase with their development team.

2. I represented Dash as a speaker and integrated Dash Platform as a partner at the first Sports Trading Tournament hosted by [ITMO University](https://itmo.ru).

https://x.com/DashNews_Daily/status/2059736456940388686?s=20

Several developers were interested in developing on the Platform. Questions from them were forwarded to the Platform's development team. As expected, regular engagement with developer communities is gradually increasing interest in Dash Platform.

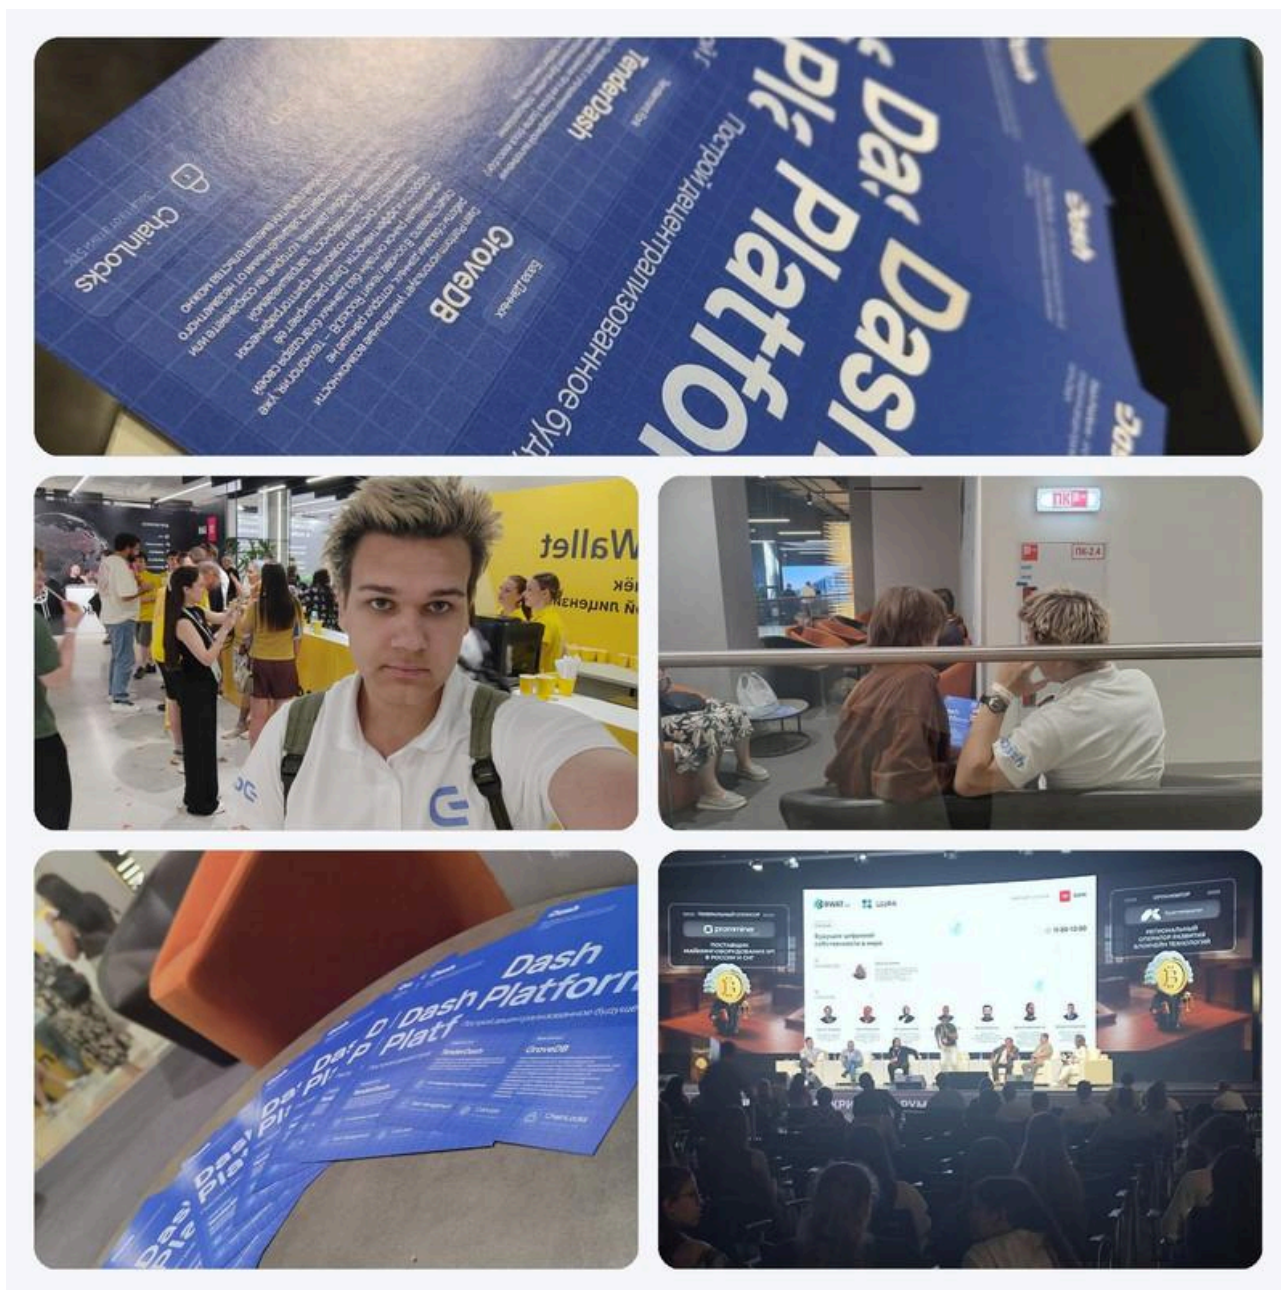

Full **photo report** are available via link:

Video: https://drive.google.com/file/d/1DW9VWkc_HL1bv11qoXqxzuTC2fM9wWos/view?usp=drive_link

3. Organized the Dash team's presence at the VIII Kazan Crypto Forum.

https://t.me/dash_chat/1/484181

4. Organized and moderated an AMA session with Joel (@TheDesertLynx) and 8Lends (<https://x.com/eightlends>), an international equity crowdfunding platform.

https://x.com/DashNews_Daily/status/2064786890775994845?s=20

5. An AMA session has been scheduled with the [Token Lab community](#).

The event will take place on June 17.

Announcement: <https://t.me/TokenLabPW/69>

6. Participated in a BitMart AMA on behalf of Dash:

<https://x.com/BitMartExchange/status/2064713643678216371?s=20>

7. Continuing work as BizDev with partners (wallets, payment platforms, developers etc).

The current status of this my activities has been updated and is available here:

https://docs.google.com/spreadsheets/d/1be_FpDHksYVZemvgCnotKLowg8SBQ4RXjftOzzOjWEg/edit?usp=sharing

I agreed that **one of the partners, 8Blocks, will develop with their own resources the "Tokenomics Calculator" dApp on the Dash Platform.** This will be a good PR case for the platform – showing other independent developers that working apps are being released on the Dash Platform.

Objectives for this proposal:

1. Participation of the Dash team at one of the largest technology events in the CIS region - **Global Tech Weekend** on June 19–21 in Georgia.

I secured a free speaker slot for Dash, but due to the lack of speakers from Dash in the Europe region and late approval from organizers I will only organize Dash representatives (network and BD) at this event.

2. AMA Session with SolanaRus (<https://t.me/SolanaRus>), one of the largest Solana developers communities around the globe.

During the session, I will present Dash Platform and the opportunities available within the Dash ecosystem. This group's audience remains one of the largest and most active among all Solana Superteams worldwide. This creates a valuable opportunity to attract attention to Dash from skilled developers and founders.

3. Speaking slot for Dash at a Web3 offline meetup and integrating Dash as an official event partner at ITMO University on July 30–31.

The event will focus on cryptocurrency regulation, blockchain adoption, and practical use cases across the CIS region. The agenda and official announcement will be released during the first half of July. Thus event will have a wide online reach within promo channels and onboard new users and developers to Dash ecosystem.

4. Organization of a joint online conference with 8Blocks.io.

With 2-4 partners with a wide audience.

5. Continuing business development activities with current and new partners from events and network.

6. Project Management for “Tokenomics Calculator” dApp development at the Dash Platform with [8Blocks.io](https://8blocks.io) as developers.

7. Managing Dash's integration in a Hot Wallet.

The total **budget** for this proposal is **65 Dash**
