

Time for Other Ways: Home Sweet Home How to build a plastic straw house

Building a straw house is a STEAM (Science, Technology, Engineering, Art and Mathematics) project to empower students with the right resources and tools to acquire 21st-century skills.

After reading the book, we suggest you build a house with plastic drinking straws to bring out your inner engineer.

You need:

- Plastic drinking straws (different colours), cardboard, glue and scissors.

Instructions:

- Divide the class into teams (3 or 4 students each).

- Watch the video  [How to make a straw house](#), "an image is worth more than a thousand words".
- Start designing and building.
- One of the team members has to record and take pictures of the whole process.
- Upload the video (use your imagination to prepare it!) into your personal eportfolio
(**Dossier: Reading Folder**).
