

# Susoft G1+ nyheter 4.05.2023

Her er nyheter som deployes i G1+ pr. 04.05.2023:

1. Nytt filter for å sette opp felter som ønskes vist i varelisten. På denne måten kan man lage en liste som gir rask oversikt over innholdet i ulike felt på varene. Listen lagres inntil den forandres, den gjelder pr. butikk.

The screenshot shows the 'Edit a column listing template' dialog box in the Susoft G1+ interface. The dialog box has a title bar with a close button (X). Below the title bar, it says 'Select the columns displayed'. There is a list of columns with checkboxes next to them. The columns are: Id, Name, Type, Sort order, Inprice, Price, Profit, Stock, ABC code, VAT, Process location, Takeaway price, Category 1, Category 2, Serving, Vendor, and Export to webshop. The 'Id' through 'Takeaway price' are checked, while 'Category 1' through 'Export to webshop' are unchecked. At the bottom right of the dialog box are 'CANCEL' and 'SAVE' buttons. In the background, there is a table of products. The table has columns: ID, Name, Type, Simple, 0 - Default, 10.58, 588.00, 459.82, -35, -35, 25.00, 0.00, and a pencil icon. The table is titled 'raigardas kisielius' and 'EXPORT FILTERS'. A red circle highlights the 'FILTERS' button in the top right corner of the interface.
