

Crash Course Cosmos

Directions: Select a planet (or any topic related to astronomy) to research and deeply explore. Gather data and statistics on the planet and plot the data using algebraic understanding. Compile information into an informative “Crash Course” style expose’ in which you record yourself teaching the audience about your planet.

HINT: start by watching some Crash Course videos, this will give you inspiration!

Lights, Camera, Action!

Directions: Select a significant scene from S.E Hinton’s novel *The Outsiders*. Rewrite the scene into a script. Cast actors for each role. Direct and film a performance of at least 5 minutes. Be sure that the scene you film highlights specific character traits and themes present in the original text. Show your movie to the class!

Debunking Sci-Fi

Directions: Critically watch the film *2001: A Space*

Odyssey. As you watch the film, take note of the scientific aspects of the movie.

Research a specific scientific concept presented in the movie and form a research-based argument about the plausibility...is it really possible? Prepare evidence to support your claim.

Run for President!

Directions: Develop a campaign platform and run for president! Identify political social issues in our country and propose solutions to potential voters. Identify long and short term goals for the country. What promises will you make to your people? How will you get voters on your side? Design campaign posters, create a campaign slogan, write a campaign

speech, and deliver it to US citizens in an attempt to convince them to vote for you.
