Does anyone at home play an instrument or have any background in music? If yes, please describe:

Music classes are one of the most beneficial activities for developing young minds. Our piano class offers the benefits of both personalized attention and group classes.

Your child will receive a one-on-one fifteen minute lesson per week wherein the focus is on their particular musical growth: **and your child will participate in a weekly class** with other enrolled piano students for a cumulative total of at least 30 minutes per week devoted to piano education. **Use of school instruments, and personal lesson books,** are included in tuition.

It is our goal to cultivate an everlasting enchantment for this instrument - and for music! Through exposure and continued repetition in a fun and creative environment, both with peers and with personalized attention, we hope that your child will delight you with a new and profoundly impactful art.
