

Wadjdan's Treasure Hunt Prepared Sequel: 16 Coins

Wazdan, an award-winning slot developer and aggregator based in Valletta, Malta, has launched the latest installment of the 9 Coins™ slot series, a coin-themed slot filled with numerous different functions and delicious jackpots.

The company's previous similar hits include 12 Coin™ and 9 Coin™: Grand Platinum Edition.

Slot Visuals:

The layout of this slot is very simple, with actions taking place on a 4×4 grid, focusing on the player hitting as many coins as possible. The game can also be played on any device, and the soundtrack completes the atmosphere of the game.

Players can't win anything in the base game and the main goal is to trigger a Hold the Jackpot™ bonus game that requires a combination of four bonus symbols to match the four center positions. However, the cache infinity symbol helps because whatever location appears on the grid, it is sticky until the next bonus round is over.

For symbols, since only high value bonus symbols are contained within the game, there is no low value symbol, and the slot also has high volatility, 96.18% RTP, and up to 10,000 times the player's bet.

Slot Features: [온라인카지노사이트 카지노사이트존](#)

Hold the Jackpot™ – This is a key feature of the entire game, played on 16 location grids. The player also starts the game with three respins, and only various bonus symbols and blanks are placed throughout the feature. Also, during this round, a new bonus symbol is sticky next to the symbol used for activation, resulting in a reset each time, and the regular cash bonus symbol lands at a value between 1 and 5 times the player bet.

But that's not all. This is because there are also three jackpots available that can be activated when mini, minor, and major bonus symbols are displayed on the grid. These symbols are worth 10, 20, and 50 times when the player walks individually. The collector symbol collects sagittal values from all existing cache and Cash Infinity™ symbols, and the total amount increases by a multiplier between x1 and x20. The mystery symbol can also be converted to any symbol except the Cash Infinity™ symbol, and the jackpot mystery symbol can be converted to one of the mini, minor, and major symbols and displayed on the three jackpots.

If the player lacks a respin, the function is terminated. However, if you can cover all 16 reels with sticky, expensive bonus symbols, you'll get a grand jackpot that's 1,000 times the player's initial bet amount. However, this is the final win of the game, so in this case, other wins are prohibited.
