

Regional Research Specialty Lead for South West Central RRDN

There are 29 roles, one for each of the following specialities:

- Ageing
- Anaesthesia, Perioperative Medicine and Pain Management
- Cancer
- Cardiovascular
- Children
- Critical Care
- Dementias & Neurodegeneration
- Dermatology
- Diabetes, Metabolic & Endocrine
- Ear, Nose & Throat
- Gastroenterology & Hepatology
- General Practice
- Haematology
- Imaging
- Infection
- Mental Health
- Musculoskeletal & Orthopaedics
- Neurological Disorders
- Ophthalmology
- Oral & Dental
- Palliative Care
- Public Health
- Renal
- Reproductive Health & Childbirth
- Respiratory
- Social Care
- Stroke
- Surgery
- Trauma & Emergency Care

Duration:	Fixed term for 3 years, with potential for renewal dependent on successful review.
Time Commitment:	0.05FTE. The time commitment is expected to be included within the job plan for the post-holder.
Salary / Reimbursement:	Existing salary with your current employer for 0.5 PAs/sessions per week / 0.05wte.
Employed by:	Your current employing organisation with reimbursement of time and travel expenses enabled through the RRDN.
Accountable to:	Post holders will report to the NIHR RRDN Health and Care Director (Medical). Additional accountability will be to the RRDN Strategic Development Director and to the relevant National Specialty Lead (NSL) .

Key Relationships:	Post holders will work closely with the RRDN Senior Leadership Team and the Strategic Development and Operations teams. Post-holders will also be expected to develop close working relationships with relevant regional external stakeholders, including Integrated Care Boards. Additional key relationships will be with the Research Delivery Network Coordinating Centre (RDNCC) teams, Regional Specialty and Settings Leads from other NIHR RRDNs and NHS England based Specialty and Setting Leads.
Review:	Post holders will report to the NIHR RRDN Health and Care directors, with a 6 month review post appointment recommended, followed by annual performance review.
Eligibility:	Any relevant health and care team member from within the South West Central region and should include leaders active in delivery of NIHR RDN portfolio research. The South West Central region includes the four Integrated Care System regions of: • Bath and North East Somerset, Swindon and Wiltshire • Bristol, North Somerset and South Gloucestershire • Dorset • Gloucestershire
Flexibility:	We are open to considering job-shares. You must identify a job-share partner and both submit an application.

Background

NIHR Research Delivery Network

The National Institute for Health and Care Research (NIHR) is funded by the Department of Health and Social Care (DHSC). NIHR works in partnership with the NHS, universities, local government, other research funders, patients and the public. The NIHR funds, enables and delivers world-leading health and social care research that improves people's health and wellbeing and promotes economic growth. NIHR is a major funder of applied health research in low and middle-income countries. Further information on the NIHR can be found at www.nihr.ac.uk.

As part of the NIHR, the Research Delivery Network (RDN) supports the effective and efficient initiation and delivery of funded research across the health and care system in England for the benefit of patients, the health and care system and the economy. The scope of RDN is to support:

- Clinical trials and other well-designed health and social care research studies which are delivered across all health and care settings;
- Public health studies that require the recruitment of individuals within an NHS setting (that is, acute, ambulance, mental health, community or primary care) or an episode of care which involves contact with the NHS.

The NIHR RDN will have two primary purposes:

- To support the successful delivery of high quality research, as an active partner in the research system
- To increase capacity and capability of the research infrastructure for the future

As a result, research will reach more people, address changing population needs, support the health and care system and the economy, and become a routine part of care.

The whole of England will be supported through 12 NIHR Regional Research Delivery Networks (RRDNs). The RRDNs will work with the national Research Delivery Network Coordinating Centre (RDNCC) to provide a joint RDN leadership function so that the NIHR RDN as a whole functions as a single organisation with a shared vision and purpose across England.

We welcome applications from all relevant professional groups (across health and care) within the specialty. Information can be made available in alternative formats. Informal inquiries can be to [insert name of contact person> (insert email address of contact person).]

We are committed to providing a culture of inclusion, respect and equality of opportunity that attracts, supports, and retains the best students and staff from all backgrounds and from across the world. Whatever role we recruit for we are always striving to increase the diversity of our community, which each individual helps enrich and cultivate.

NIHR South West Central RRDN

The South West Central RRDN covers the following Integrated Care Systems:

- Bath and North East Somerset, Swindon and Wiltshire
- Bristol, North Somerset and South Gloucestershire
- Dorset
- Gloucestershire

3.34 million people live within the South West Central region. In 2023/2024, 67,091 people participated in one of the 758 studies that were delivered across 300 organisations. This included 11 NHS trusts, 261 GP practices and 28 non-NHS sites.

The South West Central RRDN is hosted by University Hospital Bristol and Weston NHS Foundation Trust.

Role Summary

The Specialties and Settings function will play a key leadership role in the on-going development and performance of the RDN. As part of this function, Regional Research Specialty and Setting Leads, will provide leadership and advice, support research delivery, and participate in regional or national projects relating to Specialty or Setting capacity, capability and accessibility for research delivery. The Regional Research specialty and Setting Leads provide the vital link between the regional, geographically-based networks (RRDNs) and national networks of expertise which is essential to the success of the RDN.

In addition to the Regional Research Specialty and Setting Leads we will also be appointing Specialty and Setting Leads at NHS E region level who will work with the Regional Research Specialty and Setting Leads to gather local intelligence and feed it into national strategies and projects, and National Specialty and Setting Leads who will lead the whole Specialty or Setting providing strategic input and oversight, and leading the development of national initiatives for research delivery.

Specialties and Settings provide key aspects of the intelligence gathering and responsive decision making crucial to strategic development for research delivery.

Duties and responsibilities specific to this role

The role of the Regional Research Specialty Leads is primarily to support research delivery within health and care settings, however on occasion the Leads will be asked to support wider NIHR and DHSC activities. The duties and responsibilities are grouped to reflect these two aspects. Regional Specialty Leads will be expected to attend regional and national meetings and events.

Primary Role

- Strategic oversight of the regional RRDN Portfolio
 - Support regional portfolio oversight activities undertaken on the current portfolio as requested and in collaboration with the RDN Study Support Service.
 - Identify and address impact on regional health and social inequalities at all stages of research delivery within your Specialty.
- Support the RDN Study Support Service in the planning, placement and performance monitoring of studies, including when requested:
 - Assist in the identification of sites and Principal Investigators making the best use of data combined with an understanding of health and social inequalities to inform placement of studies.
 - Undertake eligibility reviews
 - Providing health and/or care intelligence to the 'on request' study performance service ⁴ and the Active National Delivery service.
- Support funders and sponsors in study design to optimise deliverability, including providing early feedback on protocols.

- Advise on study deliverability and undertake deliverability assessments when requested, including giving consideration to equitable community-wide access/areas of high patient need.
- Building regional capacity and capability for study delivery in your Specialty.
 - Ensure local needs for research delivery are identified and addressed as part of building the capacity and capability for research delivery.
 - Under the RDN Operating Model for strategic development, and Research Delivery Models participate in projects to address any opportunities or challenges identified.
- Embedding research, engagement and delivery into the NHS and wider care environment
 - Engage and initiate relevant regional stakeholders as relevant for the purpose of building regional research delivery capacity and capability within your Specialty.
 - Assist in the development and mentorship of future/new Principal Investigators across the health and care sector.
- Initiating, facilitating and promoting regional cross-specialty and cross-setting collaborations for improved research delivery
- Contributing to national and regional RDN strategic development for research delivery through:
 - Attending national specialty meetings
 - Attending regional leadership group meetings
 - Engaging with annual review development process
- Keeping up to date with innovative study design and delivery methods.
 - Share best practice across specialties
- Acting as regional NIHR RDN Ambassadors
 - Support the National and NHS E based Specialty Leads in activities to raise awareness of the Specialty.
- Engage in, and support, business development activities, including:
 - Providing health care research expertise and knowledge to support optimal research delivery in discussions with commercial organisations.
 - Attending meetings and presenting at events, webinars etc,
 - Identify and support the dissemination of RDN impact in your Specialty.

Supporting role undertaken on request by other areas of the NIHR and DHSC, via the National Specialty Lead

- Support the NIHR Coordinating Centre to develop topics for commissioned research delivery methods and the needs of all patient and care groups, including under-served communities
- Support for new chief Investigators, primarily with respect to good practice to support research feasibility and delivery, as part of a cross-NIHR programme.
- Provide peer reviews on studies for NIHR and regulatory authorities to contribute an expert opinion when needed.

Other duties

- These duties provide a framework for the role and should not be regarded as a definitive list.

⁴ Activities undertaken by the RDN, following a request by the study Sponsor/delegate, to analyse the identified performance or delivery issues in a study, identifying potential remedial actions in collaboration with the Sponsor/delegate

Person Specification

Regional Research Specialty Leads must be facilitative, be able to work flexibly and effectively in a developing organisation and to motivate and support others to deliver measurable results that make the NIHR RDN vision a reality. As a senior leader within the RRDN, the appointee will be able to act as an advocate and champion showing credibility amongst peers by actively being involved in the recruitment of participants.

Knowledge, Skills and Experience

Essential requirements for the role

- Experience of leading regionally in the relevant Specialty area, developing that Specialty collaboratively with patients and the public, and other stakeholders and establishing and sustaining outstanding service and a high-performance management culture.
- Experience of delivering research as an investigator in the relevant Specialty area and excellent general research delivery expertise.
- Knowledge of national and regional systems, structures and processes for supporting health and care research delivery.
- Evidence of motivating, supporting and coaching colleagues.
- The ability to work collaboratively, with evidence of successfully developing and maintaining effective working relationships with a range of internal and external partners and stakeholders.
- Highly developed communication and interpersonal skills, with the ability to articulate priorities, and effectively engage and influence others at all levels internally and externally, including through presentations and public speaking.
- Highly developed emotional intelligence and resilience and the ability to operate effectively in an ambiguous and uncertain environment.
- Strong team player with the ability to act as a good citizen within the network representing a diversity of views.
- Politically astute and sensitive to the priorities and dynamics of a complex organisation.

Essential requirements specific to this role

The RRDN Regional Specialty Lead must:

- Be able to evidence clinical (includes all health professions), social care, or public health professional status, for example by being registered (if appropriate) on the GMC Specialist register, GMC General Practice register, NMC register, HCPC UK register, Social Work England register or relevant professional register.
- Be an acknowledged local opinion leader within the relevant specialty, with a breadth of appropriate knowledge.
