

# JD For Network Architect

Job Title: Network Architect

Company: [Company Name]

Location: [City, State]

## Job Description:

We are seeking an experienced Network Architect to join our team. The successful candidate will be responsible for designing and implementing the organization's network infrastructure, as well as providing strategic direction for the company's network initiatives. This is a full-time position that offers a competitive salary and benefits package.

## Key Responsibilities:

- Design and implement the organization's network infrastructure
- Provide strategic direction for the company's network initiatives
- Monitor and analyze network performance and capacity and identify areas for improvement
- Collaborate with other teams to identify and implement network solutions
- Identify and respond to network incidents and implement appropriate countermeasures
- Provide training and education to employees on network best practices
- Stay up-to-date with the latest network trends and technologies
- Ensure compliance with legal and regulatory requirements

## Technical Competency Requirements:

- Strong understanding of network protocols and technologies
- Experience in network design and implementation
- Experience with routing and switching protocols
- Experience with firewall and VPN technologies
- Familiarity with industry standards and best practices
- Strong analytical and problem-solving skills

## Behavioral Competency Requirements:

- Strong attention to detail and ability to meet deadlines

- Excellent written and verbal communication skills
- Proven ability to work independently and as part of a team
- Strong analytical and problem-solving skills
- Passion for networks and a willingness to learn new skills
- Strong understanding of compliance and regulatory requirements

## Qualifications:

- Bachelor's degree in Computer Science, Information Technology, or related field
- Minimum of 5 years of experience in network design and implementation
- Strong portfolio of relevant work experience
- Professional network certifications such as CCDP or JNCIS-ENT are a plus
