

## Curriculum Vitae

---

Name: Diadon Acs

Email: [diadon@conscious.energy](mailto:diadon@conscious.energy)

Phone: 503-314-3838

Location: Portland, Oregon

### Professional Summary

Experienced Manufacturing Foreman, Freelance Data Analyst, Digital Marketer with a strong focus on alternative energy solutions, particularly in Low Energy Nuclear Reactions (LENR). Skilled in managing manufacturing processes, analyzing complex data sets, and developing effective digital marketing strategies. Passionate about researching and implementing innovative energy solutions to drive sustainability and efficiency.

In 2011, Diadon began exploring “Free Energy” claims of various inventors, beginning with the infamous Bedini motor, which resulted in a falsification or “debunking” of Mr. Bedini’s claims. Bedini still had very useful methods for efficiency which shouldn’t be dismissed outright. The main reason for failure was due to battery chemistry variables arising from overvoltages and dendritic formations from the High Voltage Spikes in Back EMF collapse, giving false readings on the batteries voltage, but not total (apparent) power. This became a doorway to learn hands-on about experimental and fundamental physics since Diadon had been passionate about science and technology since he was a young child.

Through an open-source citizen science YouTube channel ‘[Conscious Energies](#)’, Diadon also explored the claims of John K. Hutchison, Nikola Tesla, and finally Stanley Pons and Martin Fleischmann et al. to which he has dedicated hundreds of hours of his time. Known for being an open minded and rationally balanced communicator, he has a drive to help co-create a more harmonious world, despite some debating him as being delusional about a utopia. This hasn’t detoured Diadon from exploring his passions of scientific methodology to create technologies that harmonize with nature's design in order to ensure energy abundance for shared human prosperity.

Despite the more exotic applied science explorations, Diadon is a pragmatic and rational experimentalist who does everything possible to disprove a theoretical hypothesis and test his own intuitions, as not to fool himself into a belief. Inspired by people like the Great James Randi, Mr. Wizard, and Bill Nye combined with Meta-Physcial parents who were taken advantage of financially as a youth, has left a lasting impression on him. Instilling a rational point of view to differentiate between speculation and observation. He has worked on aquaponics systems, bitcoin mining, regenerative farming, PV installation, Electrochemistry, 3D printing, and Machine Learning. While not having a strong academic background, he has

experience in a variety of fields and is resourceful with a dedication to both his immediate, and extended family.

## Work Experience

Chevron Corp, Gas Attendant [1997-2000]

National Pizza Hut Call Center, CSR [2000-2002]

Loan City, Data Processing [2002-2005]

CC Slaughters Nightclub, Security/Barback 2005-2008

Kaady Car Wash, Shift Manager 2006-2008

Manufacturing Foreman, International Paper [2008-Present]

Marketing Director, Ohm Coin Project "OHMC" X13/PIVX Hash Protocols [2017-2018]

Founder/CEO Conscious Energies, llc. Freelance Data Analyst, Digital Marketer, and Researcher/Developer [2017-Present]

*Citizen Scientist/Experimental Physics. [Started in 2011]*

## Education

"C.E. Mason" Arts and Communications Magnet High School. 1996-1998

Westview High School. 1998-2001

## Skills

Diadon is an autodidact who enjoys learning and problem solving. He is excited about anything related to Science, Engineering, and Philosophy. He has experience in Project Management, Photopolymer Print Manufacturing, Data Analysis, Digital Marketing, Graphic Design, Web Development, Video Editing, Blockchain/Cryptocurrency, Research and Development in Alternative Energy, Physics, Electrical Engineering, Electrochemistry, Material Science, 3D printing, and Computer Science/Coding (C++, JS, PHP, and Python)

## Certifications and Awards

*CPR, Oregon Sub-League Gold Medalist, Oregon Open BJJ Blue Belt Silver and Purple Belt Bronze Medalist.*

## Projects

### **Completed:**

*Bedini Motor/Generator "Pulse Motor/Generator" (Battery Chemistry Changes with High Voltages) Not published for legal and respect reasons.*

*Open-Source VAMB (Vertical Axis Magnetic Bearing) Published on YouTube*

*Crystal Cell Batteries (Impeded Ion Exchange Galvanic Batteries) Published on YouTube*

*Tesla's Wireless Transmission of Power Experiments Published on YouTube*

*Tesla's Extremely High Voltage and High Frequency Experiments Published on YouTube*

[Plasma Electrolytic Oxidation and Exfoliation of Graphite](#)

[LENR-Forum ICCF25 \(Utilizing Machine Learning for Condensed Matter Nuclear Science\)](#)

### **In-Progress:**

[\*\*Project Proteus \(Electrolytic Magnetohydrodynamic Plasma in a Resonant Cavity\)\*\*](#)

[LENR or CMNS DAO](#)

[LENR\\_ARA \(Lattice Enabled Nuclear Reactions using Autonomous Agents for Reasoning\)](#)

## Interests/Hobbies

Mixed Martial Arts

Permaculture

Entrepreneurship

Fringe Science

Computer Science

Disruptive Technologies

Music/Piano

Physics

Psychology

Philosophy

## References

*Available upon request.*
