Software Launch Instructions COVHEG of Rainbow Six Siege.

Loader: Click
To turn ESP on/off use the **F2** key

Preparing the system:
Make sure you have **removed** the following software: Vanguard, Faceit, Kaspersky Anti-Virus.

Software Install:

## 0. Install the latest Nvidia Driver (**LINK**)

Connect removable media to your PC (**flash drive**) and move the folder from the archive to the flash drive.

P.S. If you don't have a flash drive, you can create **virtual flash drive** through the program OsfMount

1. Unzip all files into one folder and run loader.exe, then enter your product key.

2. Select a game and press the start button.
   2.a. If the loader returns an error at this stage, contact technical support

3. Following the loader instructions, run the game without pressing F5 in the loader.

4. Once the game's main menu has loaded, configure the OBS software:
    a. Download OBS here link (Installation is required from this link).
    b. Once you install OBS, do not update it to the latest version if the program asks you to do so.
    c. run OBS as administrator and do the following setup in OBS:

   (**Game Capture** -> Create New -> Capture Specific Window -> RainbowSix.exe)

d. Wait until the game image appears in the OBS window (As in the screenshot above)

5. Make sure you are in the main menu of the game: not in the settings, not on any other pages of the game, but in the main menu. Press F5 in the loader window and follow its instructions.

6. If the loader wrote "**Change game window mode and Press F5**", then follow these steps:

    a. Go to the game settings

    b. Switch the window mode. For example, from "Windowed" to "Maximized" or vice versa.

    c. Apply changes

    d. Go back from settings to the **main menu of the game**.
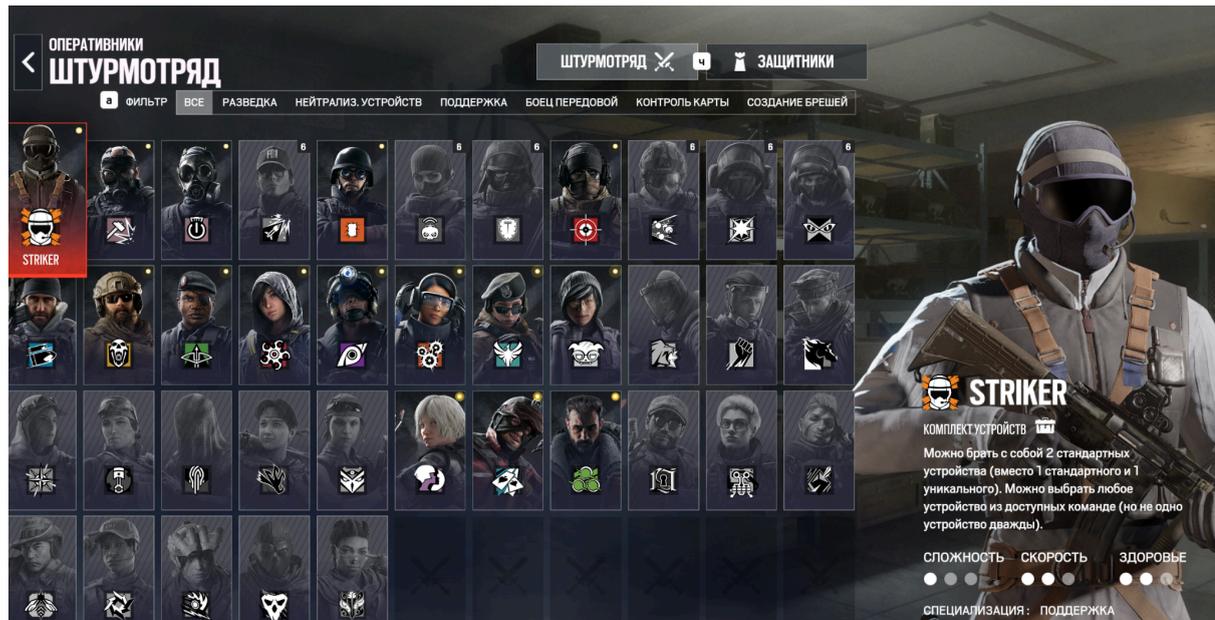

e. Press F5 in the loader.

7. The loader should notify you that the software has been successfully loaded and closed.

After that **you must activate the cheat** as follows:

a. Go to the "Operators" section and select "Attackers"

b. Move the mouse over the operative "Striker" without clicking and wait until his model appears on the right. When this happens, press F1 once (without holding it down).

c. Go to the "Defenders" section, there hover the mouse over the "Bandit" operative (without clicking). Wait until his model appears on the right, then press the F1 key once (without holding it down).

After the above steps, the cheat is configured and ready to use. Go to the shooting range to check and make sure it works.
