

After the cost intensity of the previous year, we placed a great emphasis this year on affordability. Telemetry made sure to order the cheapest variation of parts that they felt confident would work, wheels minimized test wheels and used cheaper materials, and so on. We managed to cut costs down drastically with consistent rover reliability.

We have kept intense track of our budgeting and ensured that, where we seemed to be spending too much, we would cut down. This also helped us know where we could afford to spend a tad more. This was our recipe to cost efficient budgeting.

- Frame
 - \$768.38
- Drive Train
 - \$2,385.91
- Seats
 - \$229.38
- Telemetry
 - \$372.48
- Refurb
 - \$335.70
- Wheels
 - \$874.43
- STEM Engagement
 - \$13.95
