**SL: Have you made the 'six-figure choice'?**

There's one big choice you need to make if you want to start making a *six-figure* income with ecommerce.

The choice goes as follows...

You have *two* options.

With *Option 1* you'll continue to daydream about making *big* money...

Only to still be left disappointed that the money you expected, or should I say hoped for doesn't materialise.

You'll continue to get the same recycled advice from YouTube gurus.

Stay confused that the dozens of videos you watch each tell you to do the same thing...

But never work for you.

Continue to work like a slave labourer but still having those tumbleweed moments when waiting for those sales to roll in.

And that's not to mention that you'll be doing it *entirely* alone...

Which could take *years upon years of* tiresome trial and error.
