

Send a Chrome Tab to Another Device

Have you ever wanted to send the Chrome tab you are currently using on one device (Chromebook/laptop) and send it to another device (Chromebook/laptop)? If you are signed in to the same Google account in Chrome you can! It is very easy and very useful. Follow the steps below to do this!

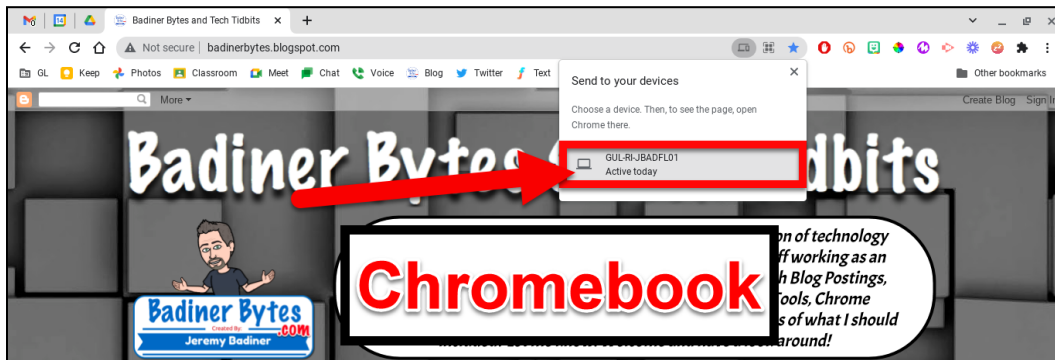

Just a heads-up: You will want to [Clear your Cache](#) and reboot each device before trying this for the first time.

Send a Tab:

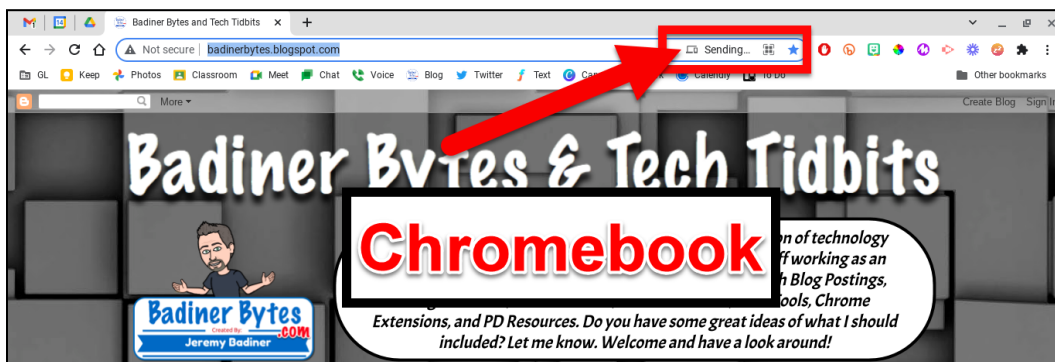

1. Make sure Chrome is open and signed into the same account on each device.
2. Open the site you want on one device.
3. Right-click in the Address Bar at the top and click on the “**Send to ‘device name’**” button.

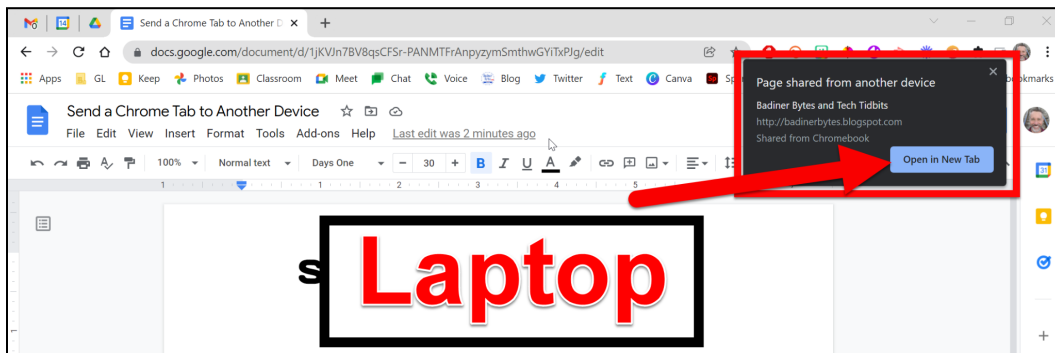

4. Choose the device to send to from the popup list.

5. You will see **“Sending”** in the address bar).

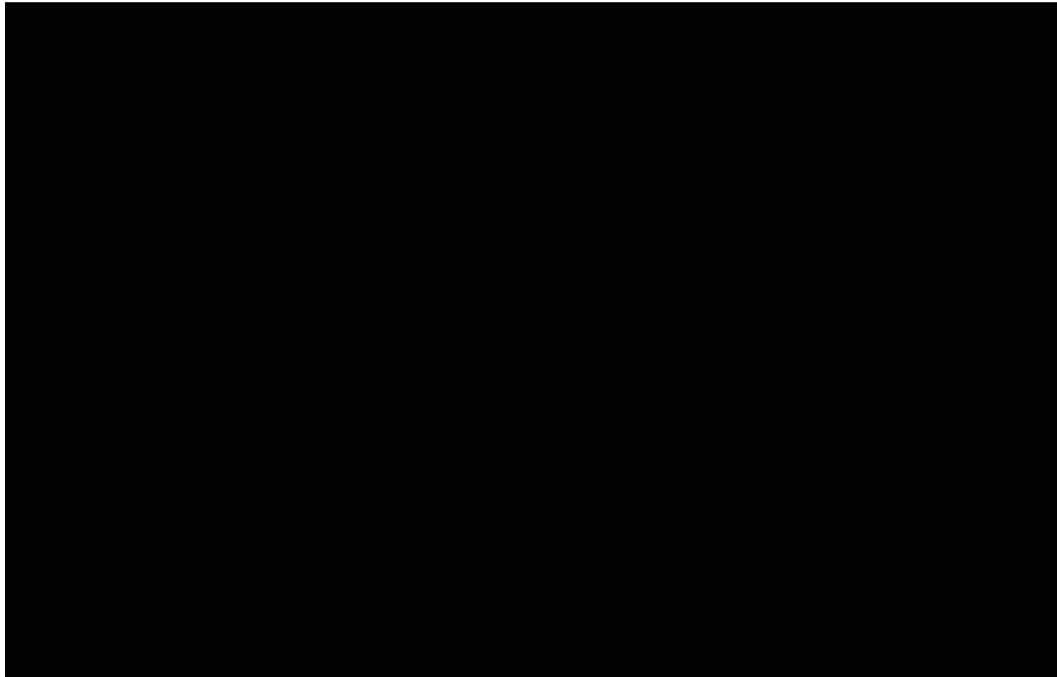

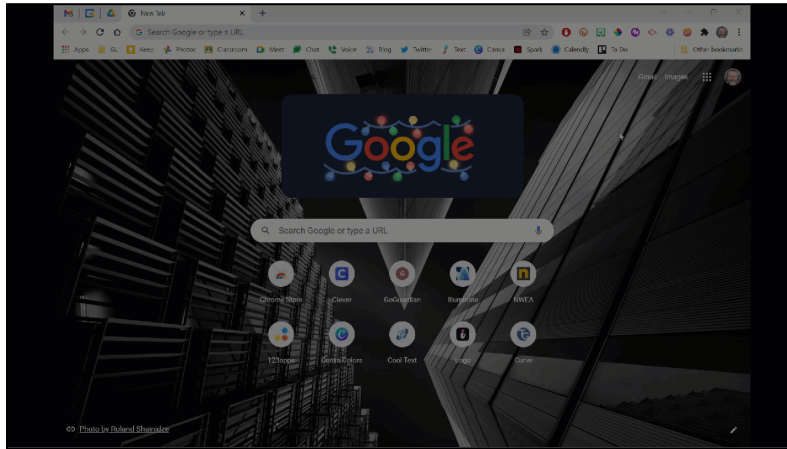

6. Go to the other device and click **“Open in a new tab”** in the pop-up.

If these steps do not work, you may need to clear your Cache.
