

Soul Magic Test Plan - Capture Game

Project Introduction

Soul Magic is a magic fantasy RPG in Decentraland, and the story starts with our main character Zee and his classmates in Elswyth Magic School. There are builds in Decentraland Worlds: Arcania and 10 locations in Genesis City: Main scene at (-29, 80), Elswyth Magic School (-95, -89), Angkor Temple at (111, -102), Space at (99, -112) as well as 6 Card Game Arenas in Decentraland. Players can collect resources through activities such as mining, farming and fishing, train skills, and craft items including NFT wearables and furniture. Capture Game is the NFT trading card game of Soul Magic. The genesis NFT collection of our avatars has 266 items with over 200 traits.

Preparation

If you have played Soul Magic previously, please set up a new Ethereum wallet address so that you can log in the game as a new player.

Scope of Testing

This testing session mainly focuses on our NFT trading card game - Capture Game. The actual game will require owning the NFT cards to play PvE and PvP modes. A PvE demo is created for this testing session for testers to play the game versus computer without having to own the NFTs. Our focus will be on testing the playability of the game, performance as well as the understandability of UI elements. Additionally feedback on any bugs noticed and suggestions on the game would be greatly appreciated. Please have a look at the tutorial video or complete game guide before playing the game.
