PROFILE

Software Engineer specializing in PHP development, utilizing my 5+ years of experience in creating and maintaining successful SEO friendly websites, developing engaging content, and best practices in programming. Although I am primarily focused on PHP backend development, I have also acquired experience with JavaScript Frameworks. My goal is to create interactive and interesting web applications.

EXPERIENCE

Junior Software Consultant, Commerce Connections LTD, UK.

Sept 2023- January 2024

- Developed a sales-based website for a B2B business model.
- Process and Manipulate Edbic API to Ionic Website (TypeScript).
- Adhered to the best practices of MongoDB and FormBuilder in Angular.

Full Stack Developer, MNB Technologies BD LTD.

May 2019- November 2022

- Developed three projects from scratch to deployment.
- Adhered to the best practices to avoid SQL injections.
- Implemented a custom bulk email sender for marketing purposes.
- Applied Payment API with Stripe, PayPal SDK.
- Optimized website performance with SQL indexing and in-memory caching.

Junior PHP Developer, Mazegeek Inc.

August 2018 – April 2019

- Started an Internship as a PHP developer and later promoted to Junior PHP Developer.
- Implemented Laravel API for Android and IOS platforms.
- Acquired knowledge of SEO friendly approaches.
