You can use these slash commands in the supported websites (<https://kbin.social>, <https://fedia.io>, <https://karab.in>, and <https://www.kbin.cafe>) to replace the command with the corresponding emoticon. For example, if you type `/shrug` in a text area, it will be replaced with the `\\_ (ヾ) \_/` emoticon.

Feel free to use these commands to add emoticons to your text easily!
