For the final round, the entire problem set will be divided into three parts (A, B, C) and each team member will get exactly 30 minutes to work on each part, alternately. For example, in the first 30 minutes the three team members will be solving parts A, B and C respectively, in the next 30 minutes they will be solving parts C, A, B respectively, and in the last 30 minutes parts B, C, A respectively. Each part will consist of exactly 2 problems. Additionally, a bonus part consisting of 1-2 problems will be available in the last 30 minutes.
