Promoted

Core Idea: Ability to charge 3 devices at the same time, using only one charger

Lead Type: Problem Solution

Stage of awareness: Solution Aware

Charge 3 devices with only ONE charger, charges 30 minutes faster, save energy in W terms

Appeals to more rapidness and waiting less to fully charge your device; more practical/handy, so you don't need to transport a lot of chargers; save space on the electricity tab; more safe and secure because of the active shield 2.0 that regulates temperature and adjusting power.

One Reader: Workers that need to many devices to do their jobs

One Idea: Charge 3 devices with only 1 charger

One Offer: Anker 735

One Action: Buy us

Worries

- Having to transport many chargers on its bag
- Fear of forgetting his chargers
- Having to waste time looking for all the chargers
- If it forgets the chargers, he will not be able to work
- To feel embarrassed if he forgets his chargers
-

Anker "Charge 3 with only 1" Charger

It's 7 am in the morning. You are in a hurry and take all the devices you saw. As soon as you arrived at your job and took a seat in your office, you realized your laptop needs to be charged. Searching on your bag you said "No way! I forgot my charger, I can't believe it!. I need a coffee, i'm too sleepy".

On your way to the coffee machine, you see your mate using a charger; but not any charger, it was a charger with not 1 or 2 but 3 USB PORTS!

Amazed with what you have seen, you ask him: "Hey John! How are you doing? What an amazing charger!". He responds: " Hey Jack! ¡Yes! Not only can you charge 3 different devices at the same time but, also, it regulates the temperature of the charger so you don't have to worry of your house exploding while you're sleeping!"

This is thanks to its Active shield 2.0, monitoring temperature over 3 million times per day and protecting you the 24 hours of the day.

Want a "flash" charge? Tired of having to carry too many chargers?

"High quality feel and lightning speed charging". Fernando

"Charges devices really fast!". Michael

"I picked this up as a travel charger to reduce the number of blocks I have to carry with me. I can charge my iPhone, iPad, and Apple Watch all at the same time using just this block". Mark

STOP FORGETTING.USE ANKER.

First Correction (THE CORRECTION IS IN THE NEXT PAGE, THIS IS A DRAFT).

Stop Forgetting. Use Anker

Era un día como cualquiera. El reloj marcaba las 7 y recién me levantaba. Dándome cuenta lo tarde que era, tomé todo lo que pude y salí corriendo hacia el trabajo; una vez llegado allí (todo transpirado, por cierto) y, al abrir mi mochila, me di cuenta que algo faltaba: el cargador para mi computadora. Definitivamente, un día como cualquiera.

“Necesito un café, tengo que despertarme”. Pensé. Recordando dónde se encontraba la cafetera, me dirigí hacia allí. En mi camino, pensando en lo mal que la iba a pasar por no tener mi cargador, me encontré con algo que nunca creí que existía (y no, no era Batman).

Era un amigo, cargando sus tres dispositivos con 1 sólo cargador; no lo podía creer.

Ante la curiosidad, le pregunto: “Qué es eso? ¿Dónde lo conseguiste?”. Responde: “El cargador? ¡Es un Anker 735! Desde que lo compré solo necesito un cargador para 3 dispositivos, gracias a sus 3 salidas USB; imagínate si necesitas cargar 6 dispositivos, con 2 de estos, ya estarías cubierto. ¡Indispensable para los olvidadizos!”.

IF YOU HAVE 47 SECONDS AND WANT TO KNOW ABOUT THE "HANDY CHARGER",
KEEP READING

It was a day like any other. The clock was ticking at seven, just getting up. Realizing how late it was, I took everything I could and ran to work. Once I got there (all sweaty, by the way), when opening my backpack, I realized that something was missing: the charger for my computer.

It was going to be a day like any other.

"A cup of Coffee will wake me up ": I thought. Remembering where the coffee maker was, I headed there. On my way, thinking about how bad the day was going, I came across something I never thought existed (and no, it wasn't Batman).

It was Jack (a friend), charging his THREE devices with just ONE charger; unbelievable until then.

Faced with curiosity, I asked him: "What is that? Where did you get it?". Answered: "The charger? It's an Anker 735! Since I bought it I only need a charger for 3 devices, thanks to its 3 USB outputs; imagine if you need to charge 6 devices, with 2 of these, you would already be covered. Indispensable for the forgetful!".

Want a "flash" charge? Tired of having to carry too many chargers?

IT'S HANDY, IT'S ANKER

Second Correction

1- IF HAVING TOO MANY CHARGERS HAS BECOME A NIGHTMARE, YOU NEED TO READ THIS. NOW

Nowadays, having too many devices it's kind of the norm. Just think about it, how many of your friends have an Ipad, Iphone and Macbook?

97% of U.S households have a mobile phone and the average of connected devices per household is 5.2. So yeah, I can guess that many of your friends have multiple devices.

That's great! But with great power comes great responsibility (thanks, Spidey). What I mean is that everything is sun and flowers until you watch there's 5 % left on your smartphone.

And then, on your computer.

And lastly, on your Ipad. And that's when problems arise..

Suddenly, you forgot where you left all your chargers. And while you look all over your house searching for each charger, batteries are all gone. You get really angry, you were doing too many important things on your devices.

After a while, you think: "Does a charger with 3 USB ports exist?". And let me tell you that yes, it does.

Imagine to:

-Stop running all around your house and just looking for only ONE charger that fills THREE batteries AT THE SAME TIME.

-Not getting stressed again because of having too many chargers.

-Stop wasting time on looking for all your chargers and saving more time to do other more important things.

What's the best part about it? That this not only applies to being home, but to when you go to work. How many times have you forgotten one of your chargers because they were too many? I can tell that a LOT.

Having some doubts? Look at what people says about it!
