

SPECIAL RELEASE:AQUARIUS IS UFO PROJECT, SAYS NSAPARANET ALPHA
04/01 -- No, this is not an April Fool joke. Nor, by the way,
is it the full

extent of the Big Breakthrough. But its a good start.Citizens
Against UFO Secrecy (CAUS) is reporting that the NSA has
CONFIRMED thethat th
e US Air Force project code-named Aquarius is UFO-oriented. In
theirlatest CAUS BULLETIN, editors Barry Greenwood and Lawrence
Fawcett state

thefollowing:<< One of our members, Clifford Stone, received
copies of letters sent toSenators John Glenn and Peter Domenici
affirming th

at this was so. Stonerequested the assistance of the Senators
when the NSA became balky atresponding to his requests on
Aquarius. This comes

as a striking reversal toprevious statements about the
non-relationship of Aquarius to UFOs.Apparently, the NSA does
have their own "Projec

t Aquarius" which they claimdoesn't relate to UFOs. Feeling
pressure from public inquiries which confusedthe NSA's
"Aquarius" with the rumor

ed Aquarius/UFO project, the NSA seeminglyhas decided to "spill
the beans" on the Air Force. Why this happened isunknown since
a simple "no"

to the senators probably would not have gone anyfurther. The
NSA may have felt that with the number of inquiries coming
insuddenly on Aquar
ius, there may have been a "smoking gun" in someone's handsthat
would have rendered additional denials into the category of
"bald-facedlie".

>>The significance of this revelation is this: 1) The Air
Force, contrary topublic claims, continued investigating UFOs
covertly at lea

st until 1976. 2)The document which first tipped investigators
off to the existence of Aquariusis now rendered much more
credible. That docu

ment also spoke of somethingcalled MJ-12, a rumored high-level
brain trust signed intoexistence by HarryS Truman in 1947 to
study the UFO p

henomenon. The next part of the BigBreakthrough is reported to
be an admission by the Pentagon of the continuedexistence of
MJ-12.I can now

tell you the media to keep your eyes on for further
revelations, ifany are forthcoming: The New York Times, and 60
Minutes. There are unconf

irmedreports that the latter TV magazine will be featuring a
very revealing storyon the UFO front sometime this month. There
are CONFIRMED r

eports that the NewYork Times Science editor has heard rumors
flying around the Pentagon to theeffect that either A) there
will be an offici

al announcement, or B) a whistle-blower is about to blow. In the same vein, last night I had a phone conversation with Major James McGaha, co-founder of Tucson Skeptics, Inc., the same group that today awarded the first "Fuzzy" to former state rep Jim Cooper (see <N>ews). Last year before going public with our info on Aquarius, I showed the document to the Major, whose reaction was quite interesting. When I told him last night that the document had been reportedly confirmed by Sen's Glenn and Domenici, his reaction was somewhat different. "The letters from the Senators are probably forged", he said. "You know, its like those letters from Sen. Goldwater that were circulated, to the effect that he had been denied entrance to some building at Wright-Patterson AFB, which was supposed to contain alien bodies. Those letters made the Senator look ridiculous! I'd be willing to bet some aide of his just pulled a joke." ParaNet has confirmed that the Goldwater letters were no joke. The Senator has admitted in several interviews that the event really took place. We are in the process of confirming the Glenn and Domenici letters. Details to follow. Jim Library references: <S>earch on keywords AQUARIUS, GOLDWATER, MJ-12.
