Provide a general synopsis of what the course/activity covered/contained.

Dr. Ungerer will be delivering a presentation on key aspects of the MTA's new Light Rail Modernization program, a comprehensive initiative aimed at enhancing the reliability, efficiency, and accessibility of the MTA Light Rail System. A key component of this program is the replacement of the aging high-floor light rail vehicles with modern, low-floor vehicles, enabling level boarding for all passengers. Stations will be upgraded to accommodate these new vehicles. Additionally, the existing train control system will be modernized to improve operational efficiency and reduce maintenance needs. The Maintenance and Storage Facilities will also be upgraded to streamline the upkeep of the new fleet. MTA will employ collaborative delivery models to ensure the successful execution of the projects within the Light Rail Modernization Program.

Attach any documentation of participation: i.e. Certificate of Attendance/Completion, transcripts, handouts, tests, programs, outline, reports and other demonstrative evidence of attendance.
