

Event Name:

UX First: Hands-On Wireframing Workshop

Department/ Club/ COE Name:

Developer Student Club (DSC), CMRIT

Objective:

The objective of the event was to introduce participants to the fundamentals of wireframing, offering hands-on experience in visualising and designing user interfaces. The session aimed to spark creativity, improve UI/UX design thinking, and enable attendees to translate ideas into structured digital layouts confidently and effectively.

Summary:

The event, “*UX First: Hands-On Wireframing Workshop*,” hosted by DSC and the Institution’s Innovation Council, was held on 16th April 2025 from 2:00 PM to 4:00 PM at LH 201, C-Block. It welcomed over 26 participants eager to explore the principles of UX design and practice wireframing techniques through hands-on activities.

The session focused on essential topics such as user flow, layout planning, and creating low-fidelity wireframes both on paper and digitally. Participants learned how to visualize design ideas effectively and understood the importance of hierarchy, spacing, and usability in building intuitive interfaces.

The interactive format encouraged attendees to brainstorm, sketch, and present their ideas in small groups. Collaborative feedback and guided instruction created an engaging environment, helping beginners and aspiring designers gain clarity on design thinking and UI structure.

Overall, the workshop successfully introduced participants to the basics of wireframing and user-centric design. It equipped them with practical tools and creative confidence to approach UX challenges, laying a solid foundation for future exploration in UI/UX design.

Benefits:

Participants gained practical exposure to wireframing techniques, learning how to structure user interfaces, plan screen flow, and present user journeys visually. This hands-on session helped improve their understanding of design systems and the importance of user empathy in product creation. The collaborative space encouraged idea exchange and critique, enhancing learning through feedback and peer interaction. Ultimately, the workshop empowered attendees to approach UX design challenges creatively and strategically, equipping them with a strong starting point for UI/UX projects and further exploration.
