How to Add a Printer to Newer MacBooks:

1. Open up **Apple System Preferences**.
2. Click **Print and Fax**.
3. Click the **+ sign** in the lower left of the Print and Fax window to add a printer.
4. Click **IP**.
5. Select the proper **Protocol** for your printer type. **MUST BE SET ON LDP**
6. Type in the **IP Address (10.65.X.X)** of the printer. Leave **Queue** blank.
7. Enter Room # as the name of the printer under Name.
8. Select the **Generic PostScript Printer** option. Click **Add**.
9. Click **Continue** to add the printer.
