

The Guide To the Visual Guide Workbooks

I love the [Visual Guide workbooks](#), but the topics they cover aren't in any order. This guide groups the various topics from all the grades these books cover, in order to make it easier to to use lessons from this resource in conjunction with your current study.

I made an attempt to include the Kindergarten book in this resource even though that is not a book we own. I used the online preview on Amazon, which had the section index page and some samples of the lessons. I've placed a (?) near lessons I felt uncertain about where to place, and put one's I had no idea where to place in a section at the end of this resource. If you have the KG book and find any that are misplaced, please contact me by leaving a comment on any post on my blog so I can fix that (imaginativehomeschool.blogspot.com).

KEY

KG = Kindergarten

G1 = Grade 1

G2 = Grade 2

G3 = Grade 3

P = Page (starting page only)

? = Indicates that I was somewhat unsure of the KG topic, but took a guess and placed it anyways
