Shea Nut Oil

Obtained by fractionating Shea Butter, a process that separates the lighter liquid oil from the heavier butters using gentle heat, Shea Nut Carrier Oil is a smooth, stable, and highly workable oil. Refined, bleached, and deodorized for cosmetic purposes, this carrier oil retains many of the beneficial fatty acids found in traditional Shea Butter while eliminating textural challenges.

With a light to medium consistency and excellent absorption, Shea Nut Oil is rich in unsaturated fatty acids, particularly Oleic and Linoleic, that contribute to deep conditioning benefits. Formulators favor Shea Nut Oil – RBD for its reliable performance in both anhydrous and emulsion-based products. From lip balms and moisturizers to hair masks and serums, it delivers a smooth application and a hydrated finish to a wide variety of product types.

Whether you're creating rinse-off conditioners or leave-on facial oils, Shea Nut Carrier Oil provides a consistent base that aligns with clean beauty trends and modern formulation needs.

Botanical Name: *Vitellaria paradoxa*

Origin: West Africa

Plant Part: Nut

Extraction Method: Fractionation from Shea Butter

Processing Type: RBD (Refined, Bleached, Deodorized)

Color / Consistency: Pale yellow to yellow, light to medium viscosity

Absorption: Absorbs easily with a soft, non-greasy finish

Aromatic Description: Neutral to faint natural scent

Benefits

Convenient Liquid Variety: Shea Nut Carrier Oil – RBD offers the nourishing benefits of Shea Butter in a lightweight, pourable oil format. Fractionated and refined from *Vitellaria paradoxa* nuts, this carrier oil is easier to handle and blend into formulations.

All-Natural Emollient: Rich in skin-conditioning Oleic and Linoleic fatty acids, Shea Nut Oil enhances the sensory profile of lotions, creams, lip balms, and emulsions. It softens rough patches of skin, supports barrier function, and contributes to a silky after-feel.

Refined for Stability: This cosmetic-grade carrier oil has undergone refining, bleaching, and deodorizing (RBD) to enhance clarity, minimize scent, and extend shelf life. Its clean, pale-yellow appearance and neutral aroma “carry” other ingredients effectively in final formulations.

Ideal for Sensitive Skin Types: Shea Nut Oil's smooth consistency, mild scent, and refined profile makes it suitable for products intended for dry, mature, or sensitive skin types. It is also an excellent choice for soothing skin care products, including baby care and post-sun formulas.

Unmatched Versatility: Trusted by formulators to improve spreadability and emollience in facial oils, lotions, serums, lipsticks, and hair conditioners, Shea Nut Oil – RBD's stable composition also reduces graininess in balms and enhances glide in massage blends.

Directions and Uses

- **Emollient Skin Formulations:** Use Shea Nut Carrier Oil – RBD at 5–20% in facial creams, body lotions, and hand balms to increase skin softness and prevent moisture loss.
- **Lip Care and Cosmetics:** For lip balms, nourishing lipsticks, and makeup products that double as skin care, add 3–10% Shea Nut Carrier Oil – RBD for a smooth texture and glide.
- **Hair & Scalp Conditioning:** Incorporate 2–10% of this cosmetic grade oil into shampoos, conditioners, or leave-in treatments to nourish dry hair without heaviness.
- **Massage & Body Oils:** Blend 30–60% Shea Nut Carrier Oil with other emollient oils to create body oils with excellent slip and gliding properties. Ideal for massage and aromatherapy applications..
