[The word count is Min = 3000 words Max = 5000 words, the paper size is A4, and it uses 1.15 spaces]

Introduction

This section contains the background or context of the research, research problems, research solution plans, research objectives, summary of theoretical studies related to the research problem, and hypotheses (if any).

The subtitle is centered in capital letters at the beginning of each word except for conjunctions (Times New Roman 12, bold). For sub-headings, it is written left-aligned with capital letters at the beginning of each word except for connecting words. For the third level subtitle, it is written in capital letters and in bold, only at the beginning of the sentence, and so on.

Method

Contains the type and research design, research variables, population and research samples, data collection methods, data analysis methods (can be adapted to the research approach used, quantitative or qualitative).

Results and Discussion

The results and discussion are adjusted to the research approach. If the quantitative research approach consists of descriptive statistics, the results of the assumption test and the results of hypothesis testing are then analyzed critically. If the qualitative approach is in the form of themes from the results of the qualitative analysis carried out.

Tables, Figures and Formulas

Each table or figure is given a serial number, title, according to the contents of the table and figure, and the source of the citation if any. The source of the citation is written under the table or figure, Times New Roman font size 10. The title of the table is written above the table and the title of the figure is written below the figure. Formulas are created using the Equation feature in Microsoft Word.

Example table:

Table 1 (table number)
Measuring Instrument Validity and Reliability(table caption, Title Case, italicized)

Variable	F	Significance
Religiosity*Moralit y	79,69 8	p<0.01
Religiosity*Moralit y	37,70 0	p<0.01

Sample image:

Figure 1 (image no.). Image caption (Sentence case)

Conclusion

The content of the conclusion is the answer to the research objectives, not a summary of the research results. Conclusions and suggestions are made in a concise, clear and concise manner based on the results and discussion.

Declarations

Statement on the Use of Artificial Intelligence. Declares whether or not AI was used in the article.

Author contribution statement. Describes the contribution of each author to the conduct of the research and the preparation of the article, in accordance with the conventions of the specific field of study.

Funding statement. Lists funding sources and grant numbers, if applicable, or states that no funding was received.

Conflict of interest. Discloses the presence or absence of any conflicts of interest regarding the publication of the article.
