PHOTOSHOP
Challenge #2 - Remove Background

DESCRIPTION

In this assignment, you will be practicing making good selections by removing the background of 3 images.

EXPECTATIONS & GRADING CRITERIA

SKILL 2 - LAYOUT & DESIGN				
STANDARD 2 - Students will place and create content to produce a visually appealing and logical website.				
	Exceeds	Meets	Approaching	Beginning
2	I place and create content to produce a visually appealing and logical website at a level of excellence aligned with current websites from professional developers.	I place and create content to produce a visually appealing and logical website.	I place and create content to produce a somewhat visually appealing and logical website.	I place and create content on websites.

☐ Use selection tools to isolate subjects from their background.

☐ Export images to web file formats while balancing file size and image quality.

PART 1 - Prepare images in Photoshop

1	Download these files: Remove Background - Start.zip
2	You should find three images.
3	Open each image in Photoshop.
4	Use the most appropriate selection to isolate the shoe from the background in each image.
5	Export each of these images as PNGs to preserve transparency.

PART 2 - Add images to web page

1	Open the **Photoshop Skill Website** in Glitch.
2	Upload your images to the assets folder.
3	Find background.html.
4	Replace the placeholder image file paths with your file paths.
