

How (and where) To Order

Below is the order form; you would fill out the information (removing everything that's in brackets like this is) and then send it to me on Discord (@lupostrasz), after which I'll take a look at the order and, if a slot is open and unreserved and I've verified that it doesn't go against my won't-draw list, then I'll send you a reply and we'll discuss further from there!

Information for Order:

- Your username, where I can contact you, and an e-mail to send the final piece to:
- Type/category of commission (e.g. character art halfbody rough sketch):
- Information related to the subject of the commission (for example an inspiration moodboard for a character reference):
- How many characters (if applicable to the comm! +30% per additional character):
- Any additional details or extra notes you'd like to mention:

Please do remember that the final product will be sent through e-mail or Google Drive due to the size limitations imposed by Discord. That's all I need your e-mail for! You can also just have it sent through Discord with the file limitations in mind if you'd prefer, though.

By sending this order I, the client, confirm that I have read and accepted the terms of service for commissioning the artist, Lupostrasz.
