

## **Hyperhidrosis Treatment**

Abnormal and excessive sweating also known as hyperhidrosis that's not caused by heat or exertion. People with hyperhidrosis may sweat even when the temperature is cool or when they are at rest. This type of heavy sweating can cause social anxiety and embarrassment, in addition to disturbing typical everyday activities.

Botox is FDA-approved for treating excessive sweating of the underarms, it may also use in other areas, such as the hands, feet, and face. Botox works by temporarily blocking the chemicals that signal the sweat glands to activate. You may need to have several Botox injections, but the results can last for almost a year.

## **Hyperhidrosis Treatment with Morpheus 8**

Abnormal and excessive sweating also known as hyperhidrosis that's not caused by heat or exertion. People with hyperhidrosis may sweat even when the temperature is cool or when they are at rest. This type of heavy sweating can cause uncomfortable social situations and embarrassment, in addition to disturbing typical everyday activities.

Morpheus8 is an excellent, permanent, and effective treatment for excessive sweating. Morpheus8 uses a combination of microneedling and localized radiofrequency heat to reduce sweat production. The underarms as well as the palms and feet can all be treated.

You will notice a reduction in your hyperhidrosis after 2 to 3 weeks of treatment, and you can expect to notice the full benefits after three months. Unlike Botox treatment, The results are long-lasting and life-changing.
