Introduction

Please try to address the following points:

Motivation for the approach used, what aspects of it are unique, and how the model, training and solution are novel.

Use references to support your claims where possible.

Methodology & Results

Provide enough information for a knowledgeable ML practitioner to recreate your results, and keep the following points in mind:

Detailed description of the methodology used with a flow diagram of the overall framework is highly encouraged.

Please do not assume readers will be aware of acronyms and provide extended forms of shortened acronyms at least once.

Any data manipulations or pre-processing that was performed.

Any publicly available data used apart from the challenge dataset.

Self-assessment results.

Conclusion & Discussion

Summary of the challenge submission with a discussion around what worked well and what did not work well.

A few points on what the participants would change or do more in future challenges on similar data.

References

Include any references discussed in the content above.
