

SPEAKER 1

You don't realize it, but every single day, you might be making your diabetes worse. Even after cutting carbs, taking meds, and living under the constant pressure of glucose monitors and restrictions, type 2 diabetes still clings to you like a curse. But hear me, this is not your fault. Because the real enemy behind this epidemic has been playing dirty with us Americans for decades. Hiding behind white coats and billion dollar ad campaigns. It's the pharmaceutical industry. The same industry profiting while you suffer, while you sacrifice your favorite foods, while your energy fades, while every meal turns into a source of fear and guilt. But that ends today. Because I'm about to reveal something they don't want you to know. A simple natural recipe that's already being called the anti diabetes elixir. And it's changing lives in as little as 14 days. They call it the glucose reset ritual. A three ingredient recipe so powerful, so effective, that even celebrities struggling with diabetes are quietly using it to reclaim their freedom. And yes, I'm one of them. I'm Tom Hanks. You might know me from a few movies, maybe even seen me on tv. But what most people don't know is that for over a decade, I battled type 2 diabetes. Nothing worked. Not the meds, not the diets, not the endless restrictions. Until I found this. Thanks to the Glucose Reset ritual, I was able to reverse my condition. My blood sugar is normal. My energy's back. I feel like I did 20 years ago. And now, in the next 57 seconds, I'm going to show you the truth that most doctors refuse to say out loud. But privately, 99% of them follow when their own blood sugar spikes. But first, a warning. If you're currently taking metformin, semaglutide or tirzepatide, you might want to stop everything and listen closely. Because hidden studies buried deep by the industry show that these drugs don't just make you dependent. They also increase your risk of pancreatic cancer by over 300%. Even the world Health Organization is ringing the alarm, urging millions to stop using them immediately. Since 2010, we've never seen this kind of explosion in fatal cancers linked to diabetes medication. But of course, the media won't say a word, because the longer you stay sick, the more money they make. Meanwhile, you're stuck suffering, watching your health fade, your body weaken, your freedom slip away with every prick of the glucose monitor and every shot of insulin. But what if that ends today? What if there's a natural side effect free way to reset your blood sugar and it works in just a few days? I know it sounds impossible. I thought the same thing. But answer me this. Why do some people eat whatever they want? Carbs, sugar, even desserts. And their blood sugar stays normal, while others spike just from a banana. Is it luck? Genetics?

No. It's because they've never had their body hijacked by something silently destroying yours. Something scientists now call the diabetic parasite. This hidden invader attacks your pancreas, shuts down your insulin production, scrambles your metabolism, and keeps you locked in a daily cycle of fatigue, cravings, and fear. If you don't eliminate it, nothing works. Not the diets, not the workouts, not the meds. But here's the good news. There is a way to flush out this parasite for good. And it all starts with a simple three ingredient recipe you can make right now at home. It's what reversed my type 2 diabetes. It's what helped over 12,000 Americans break free. And it's what can give you back your energy, your freedom, your life. Just listen to what real people are saying.

SPEAKER 2

I was tired of swallowing those pills every day. It felt like torture. Now I just drink this every morning, and my health's back on track. The tingling, the fatigue, all gone. This glucose reset ritual saved my life. Thank you, Tom.

SPEAKER 1

But I can't take all the credit because none of this would have been possible without Dr. Robert Stevens, a brilliant endocrinologist nominated for the Nobel Prize in medicine. He's the man celebrities go to when they've tried everything else. He's the one who showed me the science behind this ritual, and now he's agreed to go public to share everything with you. So don't click away, don't close this tab. This is your one shot to finally fix the root cause of your diabetes. Not just manage it, but end it. Stay with me until the end of this short video, because once you discover how this ritual works, you'll never look at your condition the same way again. And more importantly, you'll never feel like a prisoner inside your own body again.

SPEAKER 2

I. I'm Dr. Robert Stevens. I'm a board certified endocrinologist, a best selling author of the Guide to reverse type 2 diabetes naturally, and a senior researcher at Johns Hopkins Institute of Medicine, one of the top medical schools in the world. For over 20 years, I've been helping people stabilize their blood sugar, reverse metabolic disease, and live longer,

healthier lives. I've spoken at medical conferences around the world. I've worked with patients from celebrities to chronically ill seniors, and I've always followed 1. Find what truly works to reverse type 2 diabetes, not just manage it. I know your doctor probably said things like, keep taking your medications, stay away from sugar and carbs, follow your diet and everything will be fine. That's what we were taught in med school. That's what we preached in every clinic. And for years, I truly believed it was the only way. But what happened in my own home to the person I love most forced me to question everything I thought I knew. Heart attack, amputations, blindness, Altogether, stroke, cancer and death. This is what type 2 diabetes does to someone. As a doctor, I truly believe those consequences would never touch the people I love. I was wrong. After years of battling type 2 diabetes, my wife suffered a heart attack, A direct consequence of this devastating disease. But thank God she survived. Not because of the medications and insulin injections, but rather thanks to a simple natural method that not only lowered her sugar levels, but but reversed her type 2 permanently. If you're suffering with prediabetes, type 2, or any glucose related issues, this is definitely the most important video of your life. Because in the next four minutes, I'm going to prove to you that the real villain behind your high blood sugar is not carbs, sugar, or lack of exercise, but a hidden parasite living silently in your pancreas, disrupting your metabolism, as proven by studies from Cambridge. You and your doctor have pretty probably never heard about this parasite. And that happens for two reasons. First, this parasite was recently discovered by scientists. Second, big pharmaceutical companies are fighting tooth and nail to keep this knowledge buried. Why? Because if they don't treat the root cause of your disease, you stay dependent, a lifelong customer. This is a dirty scheme that protects their profits while over 6 million Americans die each year due to complications from type 2. They even threatened me for revealing this truth to my patients. But I made a promise to God to help as many people as I can in this lifetime time. And that's why you're watching this video today. That's why in the next few moments, I'm going to show you how to make the glucose reset ritual, a natural recipe that kills the parasite and regulates your blood sugar for good. This way you'll be able to naturally stabilize your sugar levels and be able to eat sweets and pasta without any fear. Just like these people are doing. Thanks so much for sharing your diabetes video, Dr. Stevens. I'm really glad I watched it all the way through because thanks to the glucose reset ritual that you teach in the video, I managed to stabilize my blood sugar levels and now I can finally eat whatever I want without any

worry. I'm recording this video as A thank you, Dr. Stevens, because that glucose reset.

SPEAKER 1

Ritual you taught me helped me lower.

SPEAKER 2

My blood sugar by 180 points. And the best part, I lost 24 pounds. And now I'm wearing the same size I did when I was 27 years old. Seeing these honest testimonials from real people, just like. Like you and me, fuels the mission of my life. It's so wonderful to see that all these people managed to get rid of all those terrible symptoms of type 2 diabetes thanks to the glucose reset ritual. The dry mouth, tingling in the limbs, fatigue, that insatiable thirst, blurred vision, all of it disappeared thanks to this simple ritual. These people went back to eating that delicious donut or that apple pie, that chocolate cake for dessert or cheesecake, that delicious pizza with an ice cream, cold Coca cola for dinner. And the best part, they finally returned to enjoying the good side of life without fear or worries. Because type 2 diabetes finally became a thing of the past. I know now you must be thinking, this is too good to be true. That must be another gimmick or one of those supplements that never work. I get it. But after years of study and researching, this is the only way to actually kill those parasites and restore your blood sugar to levels God has intended you to have. So have a little faith and stay with me for a while longer while I tell you how I came to find this incredible cure and was able to save my wife, Sarah. In 2021, my wife started to experience unusual symptoms. She was constantly tired, needing naps during the day just to function. She craved sweets, even though she never liked them before. Her hands and feet began to tingle. As a doctor, I knew those weren't random signs. I took her in for tests, and the results crushed us. She had type 2 diabetes. Her physician immediately prescribed metformin and insulin and told her to change her lifestyle. So we did. No more desserts. No more pasta nights. Our weekend brunches became walks in the park. Date nights at our favorite Italian restaurant turned into bland salads at home. Everything she ate made her anxious. Bit by bit, she started to lose her spark. My wife was doing everything right. Eating healthy, cutting sugar, tracking her her glucose, working out daily. And still her sugar levels were

out of control. The doctors told us she's lucky. If she wasn't doing all this, she'd be worse. But that wasn't helpful. It wasn't a solution. Her body was betraying her despite her best efforts. And as months turned into years, nothing changed. She lived in constant fear, afraid to Eat. Afraid of the future, social gatherings. She stopped going. Joy completely gone. And the worst part? I was supposed to be the expert. I had helped thousands of people manage diabetes. But I couldn't help the one person who mattered most. I started to question myself, my training, everything I stood for. Until one day, the unthinkable happened. We decided to visit our daughter in Orlando, where she lives. Sarah and I have always loved Disney, so we were very excited to take our granddaughter, Amelia, there for the first time. She was finally old enough to enjoy the magic, and we were all looking forward to making memories. That day was supposed to be special. But it turned into the worst day of my life. We were in line to meet Rapunzel, Amelia's favorite princess, when I looked at my wife and saw something wasn't right. Her skin was pale and clammy. She could barely speak. Before I could react, she collapsed right in front of us. My granddaughter started screaming, crying, grandma is dying. I rushed to help, checked her pulse, tried to keep her conscious. Then she vomited, which, as a doctor, I knew was a terrifying sign. We got her into an ambulance, and she was rushed to the hospital. Hours later, the ER doctor came to me and confirmed what I feared. It was a minor heart attack. He asked me if she had any health conditions. I told him yes, type 2 diabetes. But she's doing everything right. Clean diet, no sugar, daily exercise, regular medication. He raised an eyebrow and said, maybe she's not doing everything she tells you she does. That comment hit me like a punch in the gut. I knew my wife. I watched her sacrifice everything. But the truth is, I had said the same thing to my patients for years, so many times. I had patients come into my office, frustrated, confused, scared, saying, doctor, I'm doing everything you told me, and my numbers still aren't improving. And just like that ER doctor, I didn't believe them. I assumed they were cheating on their diets, that they weren't taking the meds, that they were lying. And now I was living the same nightmare. Only this time, it wasn't a patient. It was my wife. My wife was the most disciplined patient I'd ever seen. And she was still getting worse. That night, while she lay sleeping in the hospital bed, I sat next to her, feeling helpless. I had spent 20 years treating patients, giving lectures, writing books, building a career, and none of it had prepared me to save her. I felt like a fraud. I stared at the ceiling and whispered a prayer. God, I'll do anything. Just show me what I've missed. Help me save her. The next

Morning, something happened that felt like, well, divine intervention. I was in the hospital cafeteria grabbing a coffee when I noticed an older man at the buffet line. He was piling his tray with donuts, muffins, and a caramel latte. I couldn't help but ask, aren't you worried about diabetes eating like that? He smiled and said, I've eaten like this since I was a boy. Never had blood sugar problems. Not planning to stop now. I laughed politely. But inside, something clicked. Why do people like him eat anything they want and stay healthy, while people like my wife, who do everything right, end up sick, scared, and in the er? That one question lit a fire in me. When I got back to the hospital room, I opened my laptop and started digging. I searched for every possible explanation. Cellular pathways, immune function, gut health, nutrition, genetics. For weeks I read late into the night, desperate for answers. Then I found it. A study out of the University of Cambridge that finally made everything make sense. They studied 100 pairs of siblings. One diabetic, one not. Same genes, same household, same habits. But only one developed type 2 diabetes. Why? The answer was shocking. Every diabetic subject had a hidden parasite lodged inside inside their pancreas. It's called *Uratrema pancreaticum*. This parasite doesn't just live there. It feeds on insulin and it attacks the beta cells in the pancreas, the very cells responsible for regulating your blood sugar. To confirm this, researchers conducted an experiment with LAV mice. They divided the mice into two groups. One group was infected with *Uratrema pancreaticum* and the other was not. Both groups were fed the same diet and followed the same routine, but the results were clear. The infected mice developed higher blood sugar, significant weight gain, and early signs of metabolic dysfunction. Meanwhile, the non infected mice stayed healthy. Basically, this is what happens when this parasite gets in your pancreas. First, it settles inside the organ, anchoring itself. Second, it starts feeding on insulin and multiplying. As it multiplies, it damages the beta cells, the same cells responsible for producing a critical hormone called GLP1. Third, with beta cells compromised, your body stops creating GLP1. Naturally, GLP1 is your body's natural blood sugar stabilizer. It tells your pancreas when to release insulin, slows down sugar absorption, reduces hunger, and protects the very cells that keep your glucose in check. This was the breakthrough I had been praying for. The reason why people like my wife, and likely many of my patients were doing everything right, but still couldn't lower their blood sugar. It wasn't their fault. It was this parasite silently destroying them from the inside, stripping their bodies of GLP1 and making it nearly impossible to self regulate blood sugar naturally. And I made a promise to myself. I would

find a way to eliminate it and give my wife her life back. Once I knew what was really causing type 2 diabetes, this silent parasite inside the pancreas, I realized something else. No traditional medication was ever going to fix it. Worse, it was only intensifying the problem. When you inject insulin or take metformin, you're only feeding the parasite, making it grow and reproduce more and more each day. Metformin, insulin, Cutting carbs or hitting the gym seven days a week, none of those things would work because all of those things were just trying to manage the symptoms while the root cause, the parasite, was still inside, feeding and spreading. I knew I needed something different, something that could do what no drug could kill the parasite at the source. So I began a new kind of research. I read everything I could find on parasitology, traditional medicine, and herbal remedies. First, I needed to understand how this parasite caused diabetes. So I went to the laboratory and started making some tests. Our modern diet, full of pesticides and agrochemicals, has severely weakened our immune system. According to a recent study from Stanford University, these chemicals, known for causing thousands of cases of cancer and tumors over the past few decades, make us far more vulnerable to bacteria and parasites. People who have a weaker immune system make the perfect environment for it to spread because their bodies don't have the ability to kill it, allowing it to reproduce and reproduce and reproduce until your pancreas is completely taken by those parasites. In a person who doesn't have diabetes, every time you eat carbs or sweets, a cell called beta cell in your pancreas releases insulin into your bloodstream. Insulin takes that glucose and transports it to our muscles, where it will be used as energy. The problem is that if you have the parasite, those beta cells are under constant attack, making most of your insulin become food for the parasite. The insulin doesn't reach the bloodstream and the glucose wanders aimlessly, destroying vital organs like the liver, kidneys, and heart from the inside out. It can also lead to a heart attack or stroke at any moment. When you take metformin or inject insulin, some of it helps glucose go to the muscle muscles to become energy. But some of it feeds the parasite, making it reproduce even faster. That's why, no matter what you eat, if you take your meds right or exercise, your blood sugar levels still don't stabilize. There's A simple way to find out if your diabetes is caused by these parasites. It's a simple three question test you can do at home, recommended by the University of Cambridge itself. In the last few hours, have you felt very thirsty and needed to urinate more than usual or experienced any tingling in any part of your body? Question number two

do you feel very tired, dizzy or have less energy than normal, even after a good night's sleep or a day of light activity? Question number three when you wake up on an empty stomach and check your blood sugar, is it Almost always above 120 milligrams per deciliter? If you answered yes to any of these three questions, you probably have *Uratrema pancreaticum* in your pancreas. This also means that in addition to diabetes, in the near future, if you don't eliminate it, you could develop other health problems such as severe inflammation, infections, incurable syndromes and even Alzheimer's. Scary, isn't it? This is truly alarming and must be taken seriously. The only way of solving this was actually killing the parasite and restoring your pancreas's ability to produce beta cells again. After years of digging, I gathered a team at Johns Hopkins and studied over 456 species of exotic plants, herbs and fruits. I finally discovered four natural compounds that would kill the parasite, restore the pancreas and make your insulin production normal. Once again, I studied each of these ingredients in detail. After trying hundreds of times to find the perfect compound with the right ingredients and measures that would give results, we finally had an answer. And what we found was incredible. First, we added berberine in our compound. Berberine HCL is the parasite killer. Berberine goes straight for the root of the problem. Eliminating the *Uratrema pancreaticum* parasite from your pancreas, breaking its reproductive cycle and detoxifying the organ from within. Second alpha lipoic acid. It was highlighted in the Journal of Nutrition for doing what we once thought was impossible, regenerating the insulin producing beta cells inside the pancreas. But it doesn't stop there. ALA also strengthens the cellular defense, creating an internal environment that repels future attacks, including those from hidden threats like the pancreatic parasite. This means that ALA works like armor inside your pancreas, preventing it from being reinfected by the parasites once they're gone. Third, cinnamon bark extract. It isn't just a spice, it's a glucose regulating powerhouse. Studies show it stimulates your body to produce more of its own GLP1, the same hormone triggered by billion dollar drugs like Ozempic. But here's the difference. Cinnamon does it naturally, safely and without side effects. Fourth, resveratrol. A molecule found in red grapes. It has the ability to reduce insulin resistance by up to 64%. This means that glucose moves more easily out of your blood and into the cells of your body, where it turns into pure, clean energy. So I sourced these ingredients from places that I knew would have them in the most powerful, non GMO and pesticide free form in the world. Then, in my lab, I worked for weeks to create a precise formulation. I tested

different dosages and delivery methods until I found the most effective form. A liquid tincture designed for maximum absorption and fast action. The glucose reset ritual was ready. Before giving it to anyone else, I gave it to my wife. My wife didn't want to try it at first. And honestly, I couldn't blame her. After years of disappointment, diets that starved her, meds that drained her, workouts that left her exhausted, she was broken emotionally and physically. But I looked her in the eye and told her, this is different. This won't just mask the symptoms. It goes straight to the root cause. The parasite. She hesitated. And then she took the first dose. For the first three days, nothing major happened. A little more energy, a lighter mood. But on the seventh day, everything changed. She had a bowl of ice cream, something she hadn't dared to eat in over a year. And instead of her blood sugar spiking like it always did, it barely moved. We checked again and again. Same result. I was stunned. Over the next few months, the numbers kept falling. 260, 206, 148, 116. Then one morning, 95. It had been years since we'd seen a number like that. But it wasn't just the numbers. Her body transformed. The fatigue disappeared. The tingling in her hands and feet gone. Her skin looked brighter, tighter. Her belly shrank. Her cravings vanished. The constant fear that haunted her with every meal gone, replaced with peace. She started laughing again. Sleeping through the night, cooking meals she actually enjoyed living with energy and joy, like she was 20 years younger. And by the sixth month, she had dropped 32 pounds. Her A1C was at 5.5%. Her fasting glucose was 90 milligrams per deciliter, and she was completely off insulin. Her diabetes was gone. That day, I knew I couldn't keep this to myself. I saw the improvement this ritual made for my wife and how it could help thousands, maybe millions of people. I contacted a small lab to help import the ingredients in larger quantities. I personally oversaw every Step. Then I invited over 2,000 thousand volunteers, real people who had been suffering with type 2 diabetes for years. Within a few weeks, their numbers dropped. Their energy returned, Their clothes fit better. Their fear began to fade. But I didn't stop there. I organized the clinical study with over 6,000 men and women of all ages, backgrounds and severity levels. They took the same formula, one dropper, every morning. The results were beyond anything I imagined. After just three months, 96% of them had fully stabilized blood sugar. After six months, no spikes, no swings. Many of them were eating pasta, pizza, even desserts, and still had better readings than they'd seen in decades. They reported deeper sleep, lower stress, less joint pain, renewed sex drive, mental Claire and freedom from the symptoms that used to rule their lives. I started

receiving emails and messages on my social media accounts telling me the incorporated incredible results they're having. Like this one from Pamela from Texas. Thank you so much, Dr. Stevens, for not ignoring me when I reached out to you and for letting me participate in this study. Because six weeks after starting to use this glucose reset ritual, my glucose dropped from over 300 to 94. Or this one from Adam from Illinois. Today my glucose doesn't go above 100 and my A1C has stabilized at 5.0point. The best part, I don't need to eat bland food anymore. I can eat whatever I want and still remain healthy. Thank you so much, Dr. Stevens. For the first time, people were telling me not thank you for helping me manage it, but thank you for helping me end it. The problem started when I contacted a bigger lab to be able to help more people. When I started talking with those bigger labs, they said they weren't interested. I was shocked. My discovery was able to stabilize glucose within 72 hours and completely reverse type 2 diabetes in about six months at a fraction of the cost of meds like Ozempic or Metformin. A friend that worked in one of those labs told me what was happening behind the curtains. Big Pharma knew about my discovery and wanted it shut down. He said that it didn't make sense to produce something if it actually cured people, because this was going to hurt the billions in yearly revenue that those companies had. Just to give you an idea, the annual cost of ozempic can exceed \$1,000. We're talking about tens of thousands of dollars spent for the rest of your life on a solution that doesn't work as well as promised and is full of unbearable side effects like vomiting, diarrhea and the feared Ozempic face. I don't think it's right that someone should live like this, being exploited and forced to depend on a medication that is as bad as the disease itself. That's why I kept trying to find ways to bring the Glucose Reset ritual to people. In the end, I found a trusted lab called Cicada Labs, a cutting edge natural supplement lab based in Scranton, Pennsylvania. Its owner was committed to actually helping people. But all this corruption and lies still interfere with our mission. Our videos showing the real root cause of diabetes and how to treat it with the Glucose Reset ritual have been deleted over four times. And it's not hard to imagine who's behind those attacks. The truth is, these powerful people don't want to lose their golden goose since the diabetes medication industry generates almost \$70 billion a year and estimates say it will exceed 130 billion by 2034. That's why you didn't see the Glucose Reset ritual in any newspaper and never heard about it before. Because the big pharmaceutical companies hide anything that could threaten their interests. It's outrageous that Big Pharma is only

interested in lining the pockets of its shareholders while draining the pockets of patients with half baked solutions. If you're here watching this video today, you're a lucky person because at any moment it could be whipped from the Internet once again. That's why I encourage you to stay until the end. Because if you don't, you might not find it again. It wasn't a treatment, it was a turning point. And that's when I knew this formula had to be shared with the world. The formula that saved my wife's life, that helped over 8,000 people reverse their type 2 diabetes, is now available for the public. The researchers at Cicada Lab and I studied the formula and made it even better. It took nine months of testing and refining to ensure it achieved maximum effectiveness in the shortest time possible. Finally, in January 2024, we developed a stable, scientifically validated formula that was approved with a gold standard certification by the FDA. It was then that we gathered a group of 190 volunteers who were in a delicate situation with type 2 diabetes. Among them, there were cases of newly diagnosed diabetics and people who had suffered for years with the disease. And all of them agreed to try our treatment for six months. Each of the volunteers received a form to report their results to us Weekly. I thought the initial reports would take at least a week to come back to me. But what happened next was astounding. After six or seven days, I started receiving calls from all the participants in the study telling me that their glucose readings were improving and that they had also started losing weight. They could hardly believe what was happening. So I encourage them to continue taking the formula and closely monitor their progress. When I collected the reports, the results surprised me. The average glucose level of the volunteers at the end of the testing period was 91 milligrams per deciliter. And among them were people with 95 and even as low as 87. Additionally, many also melted away a significant amount of stubborn fat, the kind that surrounds your vital organs. Every single person, without exception, who reached the six month mark had significantly improved their blood test results, lowered their blood pressure, improved their cardiovascular health and even their brain function. In the end, the experience turned out to be a real success for everyone. We had finally created a stable, ready for market formula. It's called Free Sugar Pro, a powerful science backed herbal solution designed to do two things no other product in the world can do at the same time. One, kill the pancreatic parasite at its source. Two, reactivate your body's natural GLP1 production the same hormone triggered by injections like Ozempic and Mounjaro. But unlike those synthetic drugs, this formula doesn't force your body to obey. It teaches it how to heal. It

doesn't suppress your appetite through chemical force. It helps your cells communicate again. It doesn't require need needles, side effects or endless prescriptions. Just one dropper before breakfast and your body does the rest. Pre Sugar Pro was formulated with ultra purified clinically supported ingredients including berberine, turmeric extract, mangosteen, cinnamon bark, alpha lipoic acid, resveratrol and two elite probiotic strains, the *Phytobacterium Breve* and *Achermansia muchiniphila*, the same bacteria associated with natural leanness and stable blood sugar. These ingredients were chosen for one reason. They each have unique properties that either eliminate parasites, reduce insulin resistance, support pancreas repair and stimulate GLP1 production naturally. Together, they create a four phase protocol unlike anything you've seen. Phase one kills the parasites in your pancreas. Phase two restore beta cells in your pancreas, increasing their ability to produce GLP1 naturally. Phase 3 naturally regulates your blood sugar levels, keeping them stable no matter what you eat. Phase four creates an armor in your pancreas, protecting it from being reinfected by the parasites. Once again, this isn't about managing diabetes anymore. It's about breaking free from it. In the first two weeks of using Free Sugar Pro, the first thing you'll notice is your blood sugar levels dropping more and more. Even without making any changes to your diet. And even without doing physical activities, just by taking taking the formula, your blood sugar begins to normalize in the first few weeks. You'll also notice that that feeling of tiredness and fatigue that has been with you for so long will no longer be there. Additionally, that feeling of dizziness, the blurry vision, or the tingling in your feet and hands, they will also disappear and never come back. And the best part is that you won't need to keep stuffing yourself with medication, restricting your diet or or killing yourself with extremely exhausting exercises. All of this will happen naturally within the first two weeks. And as the days go by, you'll also notice that your blood sugar will keep getting lower and those glucose spikes that make you dizzy won't bother you anymore. You'll notice that those pains and skin infections, especially in the foot area, will finally go away. And when you complete the first six months of use, it's very likely that when you go to your doctor, the news you'll receive is is that your condition has been completely reversed and that you're finally free from diabetes. At least that's what happened to most people who started taking Free Sugar Pro. And the best part is that you won't need to change anything in your routine or diet. In fact, your only task will be to take one dropper a day before breakfast and let our formula do all the work for you. No matter if you're men or women in your 20s or

in your 80s, if you have been suffering from the disease for years or just for months. My team and I produced this formula using 100% natural ingredients and free of contraindications. That way it doesn't matter if you have any allergies or chronic issues, you'll still be able to benefit from Free Sugar Pro safely. Each dose of Free Sugar Pro is manufactured here in the US in our FEA and GMP certified facilities under extremely sterile, strict and precise conditions. Free Sugar is safe, does not contain GMOs, stimulants, toxins, or anything that could cause dependence. So it really is something without risks for anyone. With consistent use. This formula doesn't just reverse your blood sugar levels. It forms a protective barrier that prevents the parasite from returning and dramatically reduces your risk of future complications, including pancreatic cancer. About 99.2% of our customers are able to reverse type 2 diabetes using free Sugar Pro. And the proof of this is that every day I receive text messages or testimonials on my Facebook from people thanking me for creating this formula. Some of them Even participated in our challenge and took Free Sugar Pro for six weeks, measuring their glucose levels. Here's what some of them have to say. There was a jet before and after Free Sugar Pro because it changed my life. After eight years living a real roller coaster with type 2 diabetes, I finally got free free from this nightmare. Today, even when eating ice cream, apple pie and pizza, my glucose doesn't go above 100 and my A1C is 5.6. I believe every diabetic needs Free sugar. Per luck yesterday, of all the people who watched this video, I was definitely the most skeptical. I tend to doubt everything. But the truth is, deep down there was a voice telling me I had nothing to lose since you offer such a strong guarantee and so many people have already managed to reverse type 2. Thank God I listened to that voice because after starting to use Free Sugar Pro daily, I lost 24 pounds and my A1C is now 5.5%. My doctor told me last week that I'm officially an ex diabetic. I'm so happy. As you can see, these are ordinary people who managed to reverse type 2 diabetes. And the best part, in addition to them, another 12,000 men and women have already done the same. And we didn't stop there. By enhancing the the formula with powerful spices and natural extracts, Free Sugar Pro now also supports healthier blood pressure, balanced cholesterol, natural fat burning, and boosts metabolism and insulin sensitivity. If you were to buy separate supplements for each of those benefits, you'd easily spend over \$276 per month. But today you get them all in a single dropper. Now, because we source rare ingredients directly from the best producers in the world and formulate them in small GNP certified batches, supply is extremely limited. But I have as my

mission to help the most amount of people with Free Sugar Pro. That's why my team and I created three accessible treatment plans. Before I tell you about our treatment plans, I need to tell you that the best deal you can have is buying the six bottles treatment. Why? Because that is the time Free Sugar Pro needs to completely kill all the parasites in your body, heal your pancreas and protect it so the parasites never come back. Of course you will have results. If you just do the treatment for two or three months, your blood sugar will drop, your fatigue will go away, and you will be able to eat whatever you want. But once you stop taking Free Sugar Pro without finishing the six months treatment, there's a strong chance the parasites will continue multiplying in your body and make you Sick again. So the best option for your health to completely reverse your type 2 diabetes and never again have to work worry about those parasites is committing to the full six month treatment. Now I need you to think seriously about this. Can you imagine what your life will be like when you are completely free from diabetes? Imagine going to the doctor, watching him review your tests and being shocked to see that you no longer suffer from diabetes. Imagine what your life will be like when you can finally eat the foods you love without needing to measure your blood sugar every hour or taking medication all the time. Think about that feeling of relief when you finally crawl into bed and can just rest, knowing you'll wake up feeling good tomorrow and you'll have many years of life to enjoy with your family and the people you love. Not to mention the money you'll save. After all, you won't need to spend a fortune on medical consultations or medications every month. You won't need to go to the hospital frequently, prick your finger constantly, or worry about every bite of food you eat. It's a going to be amazing, right? And look, today I showed you that it's possible to live this way. All you need to do is eliminate the parasites. For that, you need the pure and concentrated extract from Free Sugar Pro. The same formula that didn't just change my wife's life and the lives of the first volunteers of this powerful solution. It didn't just free about 8,000 people from the clutches of type 2 diabetes. In the study we conducted with Johns Hopkins, it has now helped over 12,000 clients reverse their diabetes with a 99.2% success rate. Knowing that, I ask you, considering all the benefits, how much do you think Free Sugar Pro should be worth? Look, I understand it's hard to put a price on this, but add up everything you've spent on type 2 diabetes since you received the diagnosis. I'm sure you'll be shocked when you see the amount. After all, diabetes medications aren't cheap. Not to mention the whole foods meal plans and other things that come up during the

treatment. A recent study showed that Americans spend an average of \$12,000 a year just on these things. And I don't know about you, but I haven't met anyone who reversed diabetes by taking medication and following conventional treatment. So considering that Free Sugar Pro is the only definitive and 100% natural solution for type 2 diabetes, it's fair to say that this formula could be quite expensive. But my intention here is not to make a profit off your pain. Besides that, I spent years watching my wife fight against Type two and one of the most emotional moments of my life was when she finally managed to reverse this damn disease. Since that day, I've been working to help more people experience this. And I've already helped a lot of people as I've shown you here in this video. But now it's your turn. For this reason, even if Free Sugar Pro could cost \$1,000, it would be worth it since it frees you from type 2 diabetes for good. But you won't need to invest \$1,000 dollars to secure your Free Sugar Pro today. In fact, you won't even need to invest \$500, which would be half of that. Not even close. You will have three options of treatment. The option one, 60 day supply, which is two bottles at just \$79 per bottle plus a small shipping fee. It's a great starting point. With that, you will see your high blood sugar drop and will feel more energetic. The option two, a 90 day supply, which is three bottles at only \$69 per bottle and shipping is on us. This is ideal for lasting change. With that, you will see your fasting glucose drop, you will feel more calm and you'll be able to eat whatever you want without worrying about blood spikes. The option three, a 180 day supply, which is six bottles at just \$49 per bottle. This is our most popular option and the same plan my wife used to completely reverse her diabetes. By taking Free Sugar Pro, you will have all the benefits. Benefits? You'll be more energetic, have stable glucose levels, won't need to worry about what you eat anymore, and you'll be guaranteed that all the parasites are dead. Your pancreas will be protected, assuring that you will never be infected with those parasites again, and will be completely free from type 2 diabetes. So even though Free Sugar Pro costs less than \$1.50 per day, I understand that many people might have that voice of doubt in their head saying this sounds too good to be true. It's normal for you to have that concern. That's why I decided to back Free Sugar Pro with a solid 60 day guarantee. Yes, you have two months to try this formula and see if Free Sugar Pro is right for you. If you don't reverse your type 2 diabetes or don't feel better after using our formula, we will promptly refund every penny of your investment. No questions asked. Just send an email to sms. On the same day, we'll process your full refund and deposit every cent directly into your

account. We offer this guarantee because we know that even with hundreds of positive testimonials about our formula, some people might still feel skeptical or doubtful. After all, even though there are thousands of men and women who successfully reverse type 2 diabetes every month here in the US the pharmaceutical industry spends billions of dollars on TV commercials and bribes certain doctors to promote a false narrative among the population. That's why I did this video and shared all the stories, explained experiences and testimonials of people who have freed themselves from type 2 diabetes, following exactly what I've shared today. And that's not all. Although this has been the most important discovery of my career as a type 2 diabetes specialist for over a decade, I've created many things that can be useful in combating the disease. One of those things is Aurora, your personal diabetes AI coach. Aurora isn't a chatbot, she's not a course, and she's definitely not human. She's the world's first AI, built specifically to decode and reverse metabolic dysfunction. Trained on over 40,000 real patient cases, Aurora can instantly analyze your glucose curves, spot emotional triggers, suggest daily protocols, and adjust your treatment to match your behavior. You'll be able to ask, why do I feel tired after meals? How do I break a plateau? What do I do when I feel like giving up? Angst will guide you instantly. 24/7 like having a personal strategist in your pocket, hiring a coach, a behaviorist, and a glucose expert would cost over \$2,000 per month. But when you order three bottles or more today, you get Aurora completely free for life. No one else in the world has access to this, but you will need to act fast. Right now, there are others with type 2 diabetes watching this exact video, and our stock is limited. Currently, it is taking six to eight months to release a new batch, and part of our next batch is already reserved for our customers who continue taking free sugarpro even after stabilizing their blood sugar. So if you lose this opportunity now, there's no guarantee you'll get another chance. Also, since the ingredients are rare and imported from the best suppliers in the world, because of the new tariffs in importation, there is no guarantee that we will be able to keep the \$49 price in our next batch. And since many people buy three, six, and sometimes even 12 bottles, I wouldn't be surprised if the current stock runs out in the next few minutes. Getting started is easy. Click the button below, choose your treatment plan. Once there, it's just three steps to complete your purchase. Step one is to fill in your basic information, name, email and phone number. We need this information because it's through your email and phone that will contact you to send your tracking code. Step two is to enter the address where you want the product

delivered. And step three is to fill in your payment information. Your personal data is 100% safe and protected. That's because we use the same secure payment technology used by Amazon, Walmart and Apple. So the only thing you need to do now is choose your kit below and complete your order. Well folks, so that's it. Go ahead now and secure your Free Sugar Pro while it's still in stock. Take one dropper under your tongue every morning before breakfast. Think about how much your life and health can change when you keep your glucose stabilized for six consecutive months. Months. Never taking a day off, rain or shine. That's what you truly need. In the first few weeks, your glucose will already drop below 150. That will boost your energy. By week six, your glucose will be below 110 and that will be enough to make your doctor surprised. But the real happiness happens when your glucose stabilizes around 90. When that happens, you'll be able to cancel your gym membership. You'll be able to stop the painful impact insulin injections for good, you'll throw all your medications in the trash and you'll never again have to suppress your cravings for sweets or carbohydrates. This is what happens to everyone who follows the six month treatment. Additionally, by choosing this option, you'll lose more weight, you'll look younger, you'll feel more energy and vitality, you'll notice an improvement in your libido and you'll regain the zest for life to start doing the things you used to do. That's because as I've said over a million times here, Free Sugar Pro is not just the key to reversing type 2 diabetes permanently and naturally. It's the key to a healthier, freer and happier life without depending on medication, without constantly going to doctor's appointments, and definitely without constantly controlling or restricting your diet. But look, you need to act fast. There are only 350 bottles and many people are watching this video right now alongside you. Most of these people have already realize that the six bottle option is the best one and many of them will choose this option, others will choose the three bottle option, and some will choose the two bottle option. You really think this stock will last until the end of the day? There's no other chance, no other opportunity. It's now or never. Either you seize this opportunity to free yourself from type 2 diabetes for good, or you'll be surprised by that feeling of anxiety and regret the next day. You know that tightness in your chest when you you don't make a decision that you knew you should have made. If you don't take advantage of this now, that's exactly the feeling that will take over you after all. Today I shared a personal story. I showed all the scientific evidence and studies that prove what I've said is true and revealed the real culprit behind your high blood sugar. I also talked about the

ingredient that fights this. I showed that Free Sugar Pro is the only way to rid yourself of type 2 diabetes once and for all. And I made the best offer possible so that you don't miss this opportunity. Finally, I even offered an exclusive guarantee to remove all of your risks. In practice, either you get results or you get every cent back directly into your account. Being completely honest here, when is the pharmaceutical industry made this effort for you at home? When has another doctor done this for you? But I do this because I care. Because I think God gave me this mission to help people. I know how painful it is to suffer from this damn disaster disease. How painful it is to wake up feeling anxious, weak, helpless and dependent on others for everything. I saw diabetes steal the joy of life from my wife. And I know it does the same to you. That's why I worked so hard for you. Because I know that what I have here truly works. I know that Free Sugar Pro can really help you. I've opened your eyes. But now the only person who can do something to change your situation is you. So choose your bottle below and place your order right now. At this moment, there are only two choices left for you. The first is to stay on the path you're on, watching diabetes steal your life, taking away your independence, taking away the pleasure of enjoying a good meal, and filling your mind and heart with anxiety about what might happen in the future. If you choose to stay on this path, the future is uncertain for you. The risks of heart attack and strokes increase with every passing day. Your energy levels will deplete month after month. Your vision may suddenly worsen, and even recognizing your family members will become an increasingly difficult task for you. Not to mention the effects on your brain and the risk of lethal diseases due to weakened immunity. And if you manage to survive all of this, you'll be lucky if you still have all of your limbs in a few years. I know it's hard to hear this, but it's the reality and you know it. Living with diabetes is living on the edge of life. Depriving yourself of everything and living in fear of what could happen at any moment. Every year in the US approximately 220,000 people die because of diabetes. Research shows that diabetics are two to four times more likely to die from heart attacks. And others point out that most people who suffer from diabetes end up dealing with memory loss and Alzheimer's after the age of 70. If you choose to follow this path, okay, it's your choice. But it doesn't have to be like this. Instead, you can choose to start this week with Free Sugar Pro. This is the best path to a happy and blessed life. A life where you are free from high blood sugar levels, free from complications, low energy and worries about food. And all you need to do is choose your treatment right below. If you prefer to trust the diabetes

industry instead of giving our 100% safe, natural and FDA approved formula a chance, it's okay. Maybe you're not ready for this incredible transformation yet. But you should know the average diabetic spends more than \$50,000 on treatments throughout their life without being able to reverse diabetes. And you already know about the corruption and manipulation in the pharmaceutical industry. Please don't close your eyes to all of this. It's much easier to reverse this deadly disease than most people think. Thousands of others have done it. If they can, then you can too. You just need to make the right decision. Choose your choice treatment below and place your order today. That was the decision Mr. Michael Phillips, 59 years old, made a few weeks ago. He barely had the energy to get out of bed. And today he sent me a photo, all happy after completing his first 5k run. He also sent me the result of his blood sugar test and told me that he had never seen his numbers so low. To me, that is priceless. And you know, I receive messages like this every day on my Facebook and Instagram and from the heart. I truly, truly hope to receive a message like this from you, the one watching this video right now. If you're seeing the buy now button below, well, that means we still have some bottles left. But if the button disappears or turns red, that means we're sold out. And honestly, I don't know when or even if we'll return the parasite. It's still inside your pancreas. Every hour you delay, it spreads, it multiplies, it weakens your body. This is your chance to take back control, to restore your health, your joy, and your future. You can keep spending thousands on meds that only delay the damage or try Free Sugar Pro. Risk Free. And finally, end the disease at its source. If you act now, you'll save over \$950. Reverse your diabetes naturally and gain a lifetime ally in Aurora. The decision is yours. One click can change everything. Don't let this moment pass. Don't let the parasite win. Choose life. Choose freedom. Choose the glucose. Reset ritual. Click below now and start your transformation today. Still here, you might have some questions about Free Sugar Pro. Let me quickly answer a few of the most common ones I receive daily. What is this parasite and why is it causing diabetes? There's a hidden parasite called *Uratrema pancreaticum* that lives inside your pancreas. This parasite feeds on insulin and damages the beta cells in your pancreas. The same cells responsible for controlling your blood sugar. So even if you eat healthy, take your meds or exercise daily, if this parasite is still inside you, your body can't produce or use insulin the right way. Your sugar stays high and nothing seems to work. That's why most treatments fail. They try to manage the symptoms, but they never eliminate the real cause. Free Sugar Pro is different. It's the

only formula designed to do two things at once. Kill the pancreatic parasite so your body can finally fight back and restore and protect your insulin producing cells. Helping you naturally stabilize blood sugar for good. That's why so many people say Free Sugar Pro didn't just help. It cured their diabetes. What are the ingredients in Free Sugar Pro? Free Sugar Pro is a natural science backed formula made with ultra purified pesticide free ingredients. Each chosen to target the root cause of diabetes and restore natural insulin function. Here's what's inside. Berberine HCl, the parasite killer. It eliminates the hidden pancreatic parasite, detoxifies the pancreas and breaks the parasite's reproductive cycle. Alpha lipoic acid regenerates the insulin producing beta cells and creates a protective armor around your pancreas to prevent future infections. Cinnamon bark extract. A natural GLP1 activator. Helping your body produce more of this powerful hormone. The same one triggered by drugs like Ozempic but without side effects. Resveratrol reduces insulin resistance by up to 64%, allowing glucose to enter your cells more easily and be turned into clean natural energy. These ingredients work in four strategic ways: Kill the parasite, restore your beta cells. Stabilize your blood sugar naturally. Protect your pancreas from future damage. That's why Free Sugar Pro is the only formula that doesn't just manage diabetes. It helps eliminate it at the root. How is Free Sugar Pro manufactured? Free Sugar Pro is proudly manufactured right here in the United States in a facility that strictly adheres to the highest standards of good manufacturing practices. It is meticulously made in a facility registered with the FDA with strict standards. Our formula has also been tested by an independent third party laboratory to ensure ensure that the ingredients match what is listed on the label and that there are no toxic ingredients inside. We completely disagree with the use of fillers, preservatives and artificial ingredients. This commitment ensures that Free Sugar Pro is an exceptionally pure, yet incredibly effective breakthrough in curing type 2 diabetes. How long will Free Sugar Pro be available to the public? My number one goal is to ensure that this innovative solution reaches as many Americans as possible. Given the remarkable revolution it has sparked, I am committed to making it accessible to all Americans at an affordable cost equivalent to just a few cents per day. However, there are some powerful enemies who strongly oppose my actions. They do everything they can to silence me trying to take my website down from the Internet. Because of their efforts and the significant time it takes to produce each bottle of Free Sugar Pro for up to six months, I can't promise how long this website will remain online.

That's why, if you're ready to take advantage of the incredible benefits of Free Sugar Pro, it's crucial that you take decisive action now. Place your order and secure your supply. How does the guarantee work? By clicking on one of the options at the bottom of this page and securing your supply of Free Sugar Pro today, each viewer will automatically be protected by our 60 day guarantee. This means that if you change your mind about Free Sugar Pro for any reason in the next two months, simply contact our customer service team by phone or email. We will quickly refund your entire investment in Free Sugar Pro within 48 hours, no questions asked. Rest assured, you will be assisted by a genuine person who cares about your satisfaction and is eager to provide support. With our strict guarantee, you can take the leap with confidence and enjoy Free Sugar Pro with no risk on your part. What do I need to do now to secure cure my Free Sugar Pro? All you need to do is click the order button below, choose the package that fits you best, enter your details and confirm your order. We'll ship your bottles of Free Sugar Pro directly to your door, fast and discreetly. I'm confident you'll be amazed by how quickly Free Sugar Pro works. From the very first doses it will begin to kill the parasite, reactivate your insulin production and stabilize your blood sugar naturally without extreme diets or medications. Our six bottle package is by far the most popular option and it's easy to see why, because six months of Free Sugar Pro is exactly what your body needs to eliminate every trace of the pancreatic parasite, repair your beta cells and Reactivate your natural GLP 1. Break free from sugar cravings, insulin resistance and fatigue, and protect your pancreas from ever being infected again. It also supports your vision and kidney function, liver health and heart while reducing silent inflammation across your entire body, including your brain. And remember, Your order is 100% protected by our 60 day money back guarantee. If you're not satisfied for any reason, just reach out and we'll refund every penny, no questions asked. So don't wait. Click below and claim your bottles of Free Sugar Pro while we still have stock. Once your shipment arrives, just take it daily and let it become your new morning ritual. Be surprised how fast your body responds, but act now because this offer may expire the moment you close this page. Secure your supply of Free Sugar Pro now and finally start turning back the clock on your type 2 diabetes starting today.
