[Game, Fish & Parks reminds public: leave deer fawns alone](#) June 5, 2013 South Dakota, Leadercourier-times.com
White-tailed deer are giving birth to thousands of fawns across South Dakota at this time of year. These young fawns soon venture into the world on shaky legs and are discovered by people living and working nearby. Every year, the lives of many fawns are upset by people who mean only to help. These people take fawns from the wild in a mistaken attempt to save them...

[Game, Fish & Parks reminds the public to leave deer fawns alone](#) June 7, 2014 South Dakota, Vermillion Plain Talk

... the animal's instinctive behavior in its first weeks of life is to remain motionless and let danger pass. A young fawn may appear helpless, but it is behaving normally in response to a perceived threat or even a predator. Adult female deer visit their fawns sparingly to nurse for only a short time then leave to find food. This short visit is an adaptation that further helps fawns avoid detection by predators...

[Guischer is a friend to the deer](#) March 7, 2013 South Dakota, Custercountynews
... "I have anywhere from 10 to 18 deer who come to eat the corn I put out," he said. "They're here 90 percent of the time." Guischer, who lives east of town, began feeding one deer three years ago. Since then, the deer not only visits Guischer every day, but brings his family and friends...
