Meta Description: Laser skin resurfacing with non-ablative fractional laser technology smooths and tightens the skin. Defy aging at Skinney Medspa in Miami, FL.

Laser Skin Resurfacing | Miami, FL

Laser skin resurfacing is a safe, non-surgical aesthetic procedure. It uses non-ablative fractional laser technology to revitalize the skin. As a result, patients notice reduced aging signs, reverse sun damage, and a brighter complexion. Today, laser skin resurfacing is FDA-cleared as safe and effective for improving skin appearance. The best part is that it is painless and requires no recovery time.

Call SKINNEY Medspa at 305-717-7576 to schedule a free consultation and learn more about laser skin resurfacing in Miami, FL. Our revolutionary laser skin resurfacing treatments help people retrieve their youth and love their skin.

Check out our patients' before and after photos to see what is possible with laser skin resurfacing. Personal results vary.* But you can see that our clients get impressive skin rejuvenation results after receiving the treatment.

INSERT BAS

How Laser Skin Resurfacing Works

Advanced laser technology penetrates the skin to heat the layers under the surface. The thermal energy triggers a therapeutic response from the body. At this point, the body produces new skin cells and makes more elastin and collagen. These structural proteins are vital for overall skin health and for looking youthful. The skin looks more plump, smooth, and evenly toned when the body has more collagen and elastin. With CO2 and Erbium fractional lasers, clients enjoy a memorable experience with top-notch skin rejuvenation.

You may benefit from laser skin resurfacing treatments if you spend much time under the sun; when melanin builds up in the skin from excessive sun exposure, freckles and brown spots form. Some refer to these as "sunspots." Laser skin resurfacing reverses sun damage by directing the laser to the build-up. The skin's pigment absorbs the laser's heat. This intense thermal energy fractures the melanin and breaks up the pigment. Patients notice a refreshing skin improvement as the body absorbs these fractured pigment pieces.

Typically, laser skin resurfacing sessions last for 15 to 90 minutes. However, the duration varies depending on the type of laser and each patient's unique treatment plan. After the procedure, the skin needs some time to heal. Clients should take extra care by applying a high SPF sunscreen for up to six months.

Laser Skin Resurfacing with Alma Laser's Pixel

Pixel by Alma Lasers utilizes fractional CO2 laser light to revitalize one's complexion. People turn to this treatment to erase years of sun damage, spider veins, and more. The laser targets common skin issues in mature people. These include wrinkles, sun damage, and hyperpigmentation, to name a few. Our clients shine with youthful, smooth, and radiant skin after the procedure. The session is painless and can take place during your lunch break.

Laser Skin Resurfacing with Fraxel

Fraxel laser skin resurfacing penetrates deep into the skin to fade sunspots and even out a person's skin tone. It also minimizes fine lines, creases, and wrinkles. Many turn to Fraxel to fade scars and stretch marks as well. Since Fraxel can be pretty aggressive, it is best for people with evident aging signs and more serious skin imperfections.

Laser Skin Resurfacing with Clear + Brilliant

[Clear + Brilliant](#) goes under the skin to stimulate cellular turnover and collagen production. Collagen in the body is responsible for strengthening the skin and keeping it wrinkle-free. Cellular turnover encourages the body to replace dead skin cells with new ones. This helps people get rid of their dull complexions and look younger and more radiant.

Overall, Clear + Brilliant is not as intense as Fraxel. Since it is less aggressive, it is best for people who want preventative care. Clear + Brilliant is also amazing for diminishing acne and shrinking pores.

Laser Skin Resurfacing with Morpheus 8

Morpheus 8 is a state-of-the-art fractional resurfacing skin procedure that renews the skin. It combines radiofrequency energy with microneedling to plump the skin, diminish facial lines, and encourage collagen production in the body.

Fractional Laser Treatment Cost

Laser skin resurfacing cost varies per person depending on the type of laser and the personal treatment plan. The best way to get an accurate quote for laser skin resurfacing is to contact SKINNEY Medspa. Schedule a free consultation to get detailed information about the cost based on the best treatment for you.

Laser Skin Resurfacing Results*

Patients who get laser skin resurfacing at SKINNEY Medspa in Miami, FL, can expect phenomenal results within three weeks post-treatment. But, like other aesthetic treatments, personal results vary.* Most men and women enjoy a clearer and more radiant complexion after laser skin resurfacing. Our laser-certified licensed skin specialists perform many laser skin resurfacing treatments each day. In addition, we will provide you with instructions on important aftercare following your treatment.
