

Contraception Mini-Presentations

Communication Assessment

Directions: For this assignment you will be creating a mini-presentation (3 - 5 minutes) explaining one method of contraception to the class. You should have visuals, a brief explanation of how the method of contraception works (in other words, the biology of how it prevents a pregnancy), and an explanation of the success of that method of contraception (births per 100 women and other statistics about success rate). You should also include an explanation of any outside factors that might impact the success of that method of contraception, including cost, side effects, social constraints, etc. The presentation will be assessed on Communication.

For a good starting source: [Planned Parenthood - Birth Control](#)

Communication: _____/7

Mark	Organization of Presentation and Use of Language
6 - 7	• Presentation is very well organized and clearly demonstrates the main points and supporting arguments, including: ◦ Method of contraception (how it works, what it does, how it prevents pregnancy, etc) ◦ Success of method of contraception (births per 100 women, cost, side effects, etc) • Visual aids lead to clarity and greater understanding, including ◦ Graphs, diagrams, images, infographics • Most information is delivered orally ◦ Effective eye contact, inflection, and limited reliance on notes • Language used is precise, scientific and specific • All facts and images are appropriately referenced according to a standard referencing convention (MLA) • "Works Cited" page present and complete
4 - 5	• Presentation is generally well organized, with some errors or omissions, including: ◦ Method of contraception (how it works, what it does, how it prevents pregnancy, etc) ◦ Success of method of contraception (births per 100 women, cost, side effects, etc) • Visual aids generally lead to clarity and greater understanding, including ◦ Graphs, diagrams, images, infographics • Information is generally delivered orally ◦ Generally effective eye contact, inflection, and some reliance on notes • Language used is generally precise and scientific, with some errors or omissions • Most facts and images are appropriately referenced according to a standard referencing convention (MLA) • "Works Cited" page present but incomplete
2 - 3	• Some evidence of organization, but presentation is scattered and difficult to follow, with errors and/or omissions including: ◦ Method of contraception (how it works, what it does, how it prevents pregnancy, etc) ◦ Success of method of contraception (births per 100 women, cost, side effects, etc) • Visual aids are present, but do not lead to clarity or further understanding, including ◦ Graphs, diagrams, images, infographics • Some information is delivered orally, but student relies heavily on visual text and/or notes • Language used is often imprecise and/or unscientific • Some facts and images are appropriately referenced according to a standard referencing convention (MLA) • "Works Cited" page present but incomplete
0 - 1	• The presentation does not reach a standard described by the descriptors.
