3. Customization

3.1 General Information

If you run into any issues while trying to customize this theme, please take the time to read the information and help presented in this customization guide first. I will try to explain some basics here, so the customization process is easier for you.

Additionally, before you come to my inbox asking about something, try to do the following things first:

- Read this customization guide.
- Read through the [FAQ](#). Maybe the question has been answered there.
- Read through the [support](#) or [answered](#) tag on my blog.
- Read through the answers on [silbrigsupport](#).
- Try to google the issue ... please.

If none of that helped you resolve the issue, send me a message via my inbox or the tumblr direct messenger.

Here is some basic etiquette because otherwise I either cannot or do not want to help you:

- Have patience – my life is busy and tumblr is not my job.
- Be nice – if you insult me, I will just block you.
- Come off anon if you send a question through the inbox.
- Please for the love of god tell me what problem is occurring, where it is occurring, and ideally also which one of my codes you're using – the more information, the easier it is for me to help you, resulting in a faster answer.
