

Privacy Policy

Effective Date: 11/25/2024

1. Information Collected:

Authentication information: The only thing collected is your api key when you enter it.

2. How We Use Your Information:

We use the api key so the extension can use Google Gemini's API. Google Gemini's API requires an api key. Everything is local to your computer which is why your api key is required.

3. Information Sharing:

Your api key is not shared/sold/distributed, it is only ever used by the extension and by Google Gemini's API.

4. Data Security:

The api key is saved directly to chrome.storage.local, so essentially the only way for the api key to be stolen is for google to get hacked.

5. Your Rights:

You have the right to correct, or delete your api key. To correct it, simply enter the new apikey in the extensions popup. To delete it, enter "aizadelete".

6. Data Retention:

The api key is retained as long as you don't update it.

7. Changes to This Policy:

This will not be updated, since the core ideas and uses of the extension will never change.

8. Contact Us:
