

Differentiating with Technology for Learning April - May 2016

Technology for Learning sessions will give educators the opportunity to learn about various web tools and sites you could use in your classroom with students the next day. Participants will investigate a variety of topics, and then complete "hands-on" activities to further explore the topic and its application in their job.

This is a blended course - a majority of the work will be completed online, along with a mandatory face-to-face session that occurs after the course has started. Content in this course is aligned to a portion of the 21 Things for Teachers content. This course is approximately 1/3 of the 21 Things course.

Important Course Dates -

Course Start Date: April 11

Face-to-Face: 4:30-7:00 April 18
choose your location -

- Berrien RESA
- Calhoun ISD
