A new way to stay connected on trips

Hi Larry, we've added a new feature to help you communicate with parents more easily on trips for teens or for someone added to their family profile.

Whenever you accept a teen ride, you'll now have access to a 3-way chat with the rider and their guardian—all within the app. This will also work for all trips under the family profile.

You can use it to confirm pickup details, share updates, or clarify instructions—all in one group chat with everyone involved.
