EE Objectives

Objective 1.: Assault of the capital's industrial area

Attack on the industrial district of the capital, located in the outer districts. The Eternal Empire does not aim to attack the civilian population, but rather seeks to attack industrial and military facilities. Invasion units land near the city and try to inflict as much damage as possible. It soon becomes clear that it is not the occupation of the planet that is the goal, but the damage to make restoration as expensive as possible. At the same time as the soldiers, Blackwatch agents and saboteurs will set off to neutralize security / defence systems and possibly shut down the

power grid.

The invasion begins when EE units have already landed with the dropships. The Black Sun's members and mercenaries helped the assault, led by Broka the Hutt's men.

Objective 2.: Where the Nexus rules

The Eclipse Rebellion Objective: They arrived a few days before the Eternal Empire fleet. They originally arrived to translate the tablet they found before, which hides the secrets of the Eternal Empire. However, the locals guard the Nexus so they didn't get there. My enemy's enemy is a situation where GA has been warned that the Eternal Empire is coming so they can prepare, however, this was not the equivalent of being able to get to the Nexus. The race starts with the Loyalists. And they can try to clean up the Dark Side Nexus, which has an effect on the entire Solar System.

Loyalist and Allies: In addition, the Eternal Empire and its allies are sending more forces into this area and this assault is being led by the new Empress Ingrid L'lerim. It is clear to outside and inside observers that they and the Sith want to get the Nexus and take control of it, only the Empress and the few initiated Warden know that they really want to destroy it. The open plans of the Eternal Empire are as follows, if they fail to get the planet and the Nexus, they must destroy it. Destroy it rather than GA or anyone else turn it back to the Light Side. If they can't get it, then no one should own it.

Objective 3.: Heavenly fight

Since GA also has a smaller fleet around the planet especially to know that EE is coming, the Eternal Empire will do its best to get through them and try to bomb the surface. From space, only industrial and military facilities are attacked, areas where there are no civilians or very few people. And they try to take the enemy fleet off the sky.
