

Classical Liberal Party Manifesto

Introduction by Party Leader /u/redwolf177

The Classical Liberal Party has a vision for Canada. A more free, fair and prosperous Canada. Through our policy, we aim to make Canada into a stronger economy, with fairer laws, and freer citizens. We are on a quest to make this dream a reality. And I invite all Citizens of Canada, from all walks of life, from all sides of the political spectrum, to join this quest, and help us realize this dream. Throughout this Platform, we will lay down our plan to help make our dream reality.

Social Policy

- We hope to increase access to Euthanasia
- We hope to Legalize Marijuana
- Maintaining Access to abortions for women across the Country
- Giving Gays full adoption rights

Domestic Policy

- Devolving Power to Provinces
- Increasing the Health Transfer to poor provinces, to help build a bigger and better health network in poor or rural areas.
- Selling off Crown Corporations such as the CBC and the Canadian Wheat Board
- Encouraging and investing in innovations in farming technology
- Cutting the Size of the Military
- Removing the Canadian Airborne Regiment

Foreign Policy

- Working with Israel to find a 2 state solution
- Stopping Russian aggression and Expansion
- Stepping up attacks against ISIS
- Opposing the Iranian Nuclear deal
- Founding an Independent Kurdistan
- Avoid tangling Canada in Foreign entanglements

Economic Policy

- Cutting Taxes on farms
- Lowering the personal income tax
- Getting rid of unnecessary regulations on small businesses

- Cutting the small business tax rate
- Cutting all unnecessary Government Spending

Now, you might think this platform is a bit short. And that is because it is. Most of what is missing from this platform are things we would have the provinces do themselves. Our main policy point is to create a new Constitutional amendment, similar to the Charlottetown Accord, which would move most Federal Responsibilities to Provincial and Municipal Governments, where they can be handled more efficiently.
