

The Order of Dao Platform¹

The Order of Dao believes that the teachings of the ancient have been misinterpreted by the Aristocrats. Therefore, we aim to have a Civilization that respects individual liberties and spread its views around the globe. In order to achieve this, the following strategies and goals will be adopted.

- All things flow naturally and so every man should be allowed to be free and find *Dao* (the way). As such, we must focus on **Culture** to rush the adoption of Social Policies in the branches of '**Liberty**', '**Aesthetics**' and '**Rationalism**'.
- As part of each individual's search for *Dao*, **religious worship is allowed** as a matter choice, but must not be imposed upon the individual.
- Progress is part of the natural flow of things, therefore we are not opposed to scientific revolutions. We will **rush** the research of **Industrialization** and the building of **Factories** in order to be the first Civilization to adopt the '**Freedom**' Ideology.
- The doors of our civilization are open for every person that seeks to find his purpose. Our great works, furnished by our free artists and architects will help us maximize our **Tourism** output in order to **increase our influence** over other Civilizations and promote the adoption of the '**Freedom**' Ideology as both the Chinese ideology and the world ideology.
- As an effort to maximize the natural flow of things, we believe that every soul in the world should be allowed to find its own path. We will enact '**Freedom**' as the **World Ideology**.
- Those that share our goals are our friends and should be treated with respect. Maintain **friendly relations** with Civilizations that protect individual liberties (adopt social policies akin to our preferred ones).
- We believe everything is part of the natural flow of the universe. However, we do not think inaction should be applied against those who attempt to interrupt it. We will **be hostile** towards authoritarian Civilizations (those who adopt '**Honor**', '**Autocracy**' or '**Order**').
- Civilizations with **any other form of government** are formed out of the flow of the universe and should not be disturbed. We will try to **maintain neutrality** towards these, if possible.

¹ The Order of Dao is a completely fictional political party for the game of Democraciv. It does not intend to disrespect any religion/philosophy or it's practitioners. The interpretations presented in this document are intended purely for roleplaying purposes.

- Some men find purpose in fighting so that others can be able to find theirs. We will give them the means to do it and **build a big military** in order to protect our sovereignty and subjugate oppressors and tyrants.
- As with all other things in the universe, resources must flow freely. We will promote a free market by trading with our allies and avoiding protectionism (Prioritizing **external trade routes**).
- If it so happens that the people of China adopt an ideology opposing the values of Dao, we will do all in our power to show them their mistake and convince them of the correct path, with the end goal of eventually transitioning to the Freedom Ideology.
- Get a **Cultural** or **Diplomatic Victory**, if possible.
